

U.S. ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (75-762)
WASHINGTON, DC 20460

EPA REGISTRATION NO. 56493-76

DATE OF ISSUANCE

MA

TERM OF ISSUANCE

NOTICE OF PESTICIDE:

REGISTRATION
REREGISTRATION

Under the Federal Insecticide, Fungicide, and Rodenticide Act

NAME OF PESTICIDE PRODUCT

NAME AND ADDRESS OF REGISTRANT (include ZIP code)

NOTE: Changes in labeling, formula, differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

1. The registrant is required to submit to the Agency, within 90 days of the date of registration, a copy of the label for the product, and a copy of the label for the product, and a copy of the label for the product.

2. The registrant is required to submit to the Agency, within 90 days of the date of registration, a copy of the label for the product, and a copy of the label for the product, and a copy of the label for the product.

3. The registrant is required to submit to the Agency, within 90 days of the date of registration, a copy of the label for the product, and a copy of the label for the product, and a copy of the label for the product.

a. Add the phrase "EPA Registration No. 56493-76."

b. Delete the term "photostable" from the product description.

At the end of this same section delete the phrase "the product is stable in sunlight" and insert the following sentence that reads as follows:

"The product is stable in sunlight as well as in shaded areas and in a treated room."

The label will be submitted to substantiate the photostability claim. In addition, since this is an indoor use product, fenoxycart breakdown from ultraviolet light would be minimal compared to an outdoor use because the house structure, glass and screens would shield the product from most of the ultraviolet light.

DATE

5/9/85

- c. Delete the statement "Ectogard House & Carpet Spray is the most advanced flea control product on the market today."
 - d. We will accept the 21-week label claim on the condition that an acceptable test be submitted within a 2-year period which demonstrates the residual of this product under actual use conditions such as vacuuming and normal household wear.
 - e. As we previously discussed on the phone, the end-use product-specific product chemistry data have not been accepted per PR Notice 86-5. Although these data have been reviewed, the data must be resubmitted and accepted through PR Notice 86-5 for our records. Please refer to the enclosed copy of your PR Notice 86-5 compliance letter for specific instructions on the deficiencies.
 - f. As we discussed on April 12, 1989, it is acceptable to add the following pests to the label: Crickets, earwigs, confused flour beetle, silverfish, ants, spiders, and pillbugs.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Ectogard™ House & Carpet Spray contains a unique combination of three insecticides that attack the flea life cycle from three directions, plus controls cockroaches, flies and ticks. 1) The first action is provided by the extremely effective quick-killing activity of pyrethrins. Pyrethrins kill insects they come in direct contact with but will not provide residual activity. 2) Permethrin is the second active ingredient in Ectogard™ House & Carpet Spray. It takes over as the pyrethrins lose effectiveness by providing a residual control of fleas in carpet. 3) The third and most important ingredient in Ectogard™ House & Carpet Spray is the new photostable insect growth regulator, Tenocide™. Tenocide™ controls fleas for 21 weeks in sunny as well as shaded areas of a treated room. More importantly, Tenocide™ inhibits development of the immature stages of the flea which prevents them from reaching the biting adult stage. Ectogard™ House & Carpet Spray is the most advanced flea control product on the market today.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION:

Harmful if absorbed through skin. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT:

IF SWALLOWED: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

IF IN EYES: Flush with plenty of water. See a physician immediately.

IF ON SKIN: Wash with soap and water. Get medical attention if irritation persists.

PHYSICAL OR CHEMICAL HAZARDS: Flammable. Keep away from heat and open flame.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic organisms. Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For use in homes, garages, attics, apartments and hotels. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

SHAKE WELL BEFORE USING

Fleas: For maximum effectiveness, the entire carpeted area should be treated. Adjust spray nozzle to create a fine spray. Apply evenly as a spray for spot treatment to infested areas such as pet beds and resting quarters, carpets, rugs, and drapes; nearby cracks and crevices; along and behind baseboards. Old bedding of pets should be removed and replaced with clean, fresh bedding prior to treatment of pet area. DO NOT TREAT PETS WITH THIS PRODUCT. To control the source of flea infestation, pets inhabiting the treated premises should be treated with a product registered for application to animals. Avoid wetting furniture and carpeting. A fine spray applied uniformly is all that is necessary to kill fleas. To kill ticks, cockroaches and flies, apply directly to pests. Leave treated areas and do not return for at least one hour. Do not allow children or pets to walk on treated surfaces until completely dry. Do not spray on pets or humans. Remove birds, nursing puppies, and cats, and cover food, water, fish bowls and aquariums before spraying.

Do not use in edible product areas of food processing plants, restaurants, or other areas where food is commercially prepared or processed.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in a cool dry place, away from children. Store above freezing (32°F) and protect from high temperatures. Do not reuse empty container. Rinse thoroughly before discarding. Securely wrap original container in several layers of newspaper and discard in trash.
