EctoGard House & Carpet Spray contains a combination of three insecticides that attacks the flea life cycle from three directions & controls ticks, cockroaches, crickets, silverfish, earwigs, sowbugs, confused flour beetles, ants, spiders & flies. 1) The first action is provided by the effective, quick-killing activity of pyrethrins. Pyrethrins kill insects they come in direct contact with but will not provide residual activity. 2) Permethrin is the second active ingredient. It takes over as the pyrethrins lose effectiveness by providing residual control of fleas, in carpet. 3) The third & most important ingredient is the new insect growth regulator, Tenocide. It inhibits development of the immature stages of the flea for 21 weeks, preventing them from reaching the biting adult stage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through skin. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap & water after handling.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED call a physician or Poison Control Center. Drink 1 or 2 glasses of water & induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

IF IN EYES flush with plenty of water. See a physician immediately.

IF ON SKIN wash with soap & water. Get medical attention if irritation persists.

PHYSICAL OR CHEMICAL HAZARDS Flammable. Keep away from heat and open flame.

ENVIRONMENTAL HAZARDS This product is toxic to aquatic organisms. Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in a cool, dry place, away from children. Store above freezing (32°F) & protect from high temperatures. Do not reuse empty container. Rinse thoroughly before discarding. Securely wrap empty container in several layers of newspaper & discard in trash.

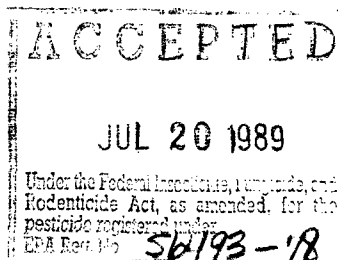

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For use in homes, garages, attics, apartments & hotels. Do not use this product on electrical equipment due to the possibility of shock hazard.

SHAKE WELL BEFORE USING

Fleas: For maximum effectiveness, the entire carpeted area should be treated at the rate of 1 qt./500 sq. ft. Adjust spray nozzle to create a fine spray. Apply evenly as a spray for spot treatment to infested areas such as pet beds & resting quarters, carpet, rugs, & drapes; nearby cracks & crevices; along & behind baseboards. Old bedding of pets should be removed & replaced with clean, fresh bedding prior to treatment of pet areas. DO NOT TREAT PETS WITH THIS PRODUCT. To control the source of flea infestation, pets inhabiting the treated premises should be treated with a product registered for application to animals. Avoid wetting furniture & carpeting. A fine spray applied uniformly is all that is necessary to kill fleas. To kill ticks and other labeled insects, apply directly to pests. Leave treated areas & do not return for at least one hour. Do not allow children or pets to walk on treated surfaces until completely dry. Do not spray on pets or humans. Remove birds, nursing puppies & cats, & cover food, water, fish bowls & aquariums before spraying. Do not use in edible product areas of food processing plants, restaurants, or other areas where food is commercially prepared or processed.
