PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION! Harmful if swallowed or absorbed through skin. Harmful if inhaled. Avoid breathing of vapors or spray mist. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: Wash with plenty of water. Get medical attention.

IF SWALLOWED: Drink or eat two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Call a physician immediately.

IF ON SKIN: Wash with plenty of soap and water.

IF INHALED: Remove victim to fresh air and administer artificial respiration if needed.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water. Do not contaminate water by disposing of equipment washwaters.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Store out of the reach of children. Protect from freezing. Store at temperatures between 30° F (10° C) and 120° F (49° C).

DISPOSAL: Household - Do not reuse container. Securely wrap original container in several layers of newspaper and discard in trash.

Commercial - Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Do not contaminate water, food, or feed by storage or disposal.

Container Disposal: Triple rinse (or equivalent). Then offer to recycling or reconditioning, or purchase and dispose of in a sanitary landfill or incinerate, or, if allowed by state and local authorities, burn. If burned, stay out of smoke.

INSTRUCTIONS

Coverage: Approximately 250-250 sq. ft. (18.5 - 23.2 sq. meters) per gallon of mixed product (3.78L) when applied evenly to a smooth surface. Coverage figures do not include allowance for surface irregularities, porosity, or spray loss.

Area Preparation: Spray all shrubs and foliage liberally with water and cover with plastic or cloth. After application, thoroughly rinse MILDEW CHECK Wash from affected areas, uncover shrubs and foliage, and allow to dry with water. Prevent solution from coming in contact with surfaces which might be damaged by dilute bleach, such as clothing and lawn furniture. Automobiles should be protected from possible overspray.

Surface Preparation: No special preparation is required when used as a mildewcid/algicidal wash. When repainting after washing, prepare surfaces as required before repainting. (See Application Precautions.)

Safety Precautions For Mixing With Household Bleach - Household bleach may cause severe skin and eye irritation. Read and follow all directions on bleach bottle when mixing with MILDEW CHECK Wash. Avoid contact with skin and eyes and inhalation of mixed solution. Wear safety glasses, protective clothing and gloves.

Pre-Test: When using MILDEW CHECK Wash as a mildewcid/algicidal wash only, protect a small hidden area for color fastness and coating adhesion. Combine one tablespoon of household bleach with 1/3 cup of MILDEW CHECK Wash and mix well. Sponge, dab, or brush the solution on the test area and wait 20 minutes. Rinse well. If color fading or lifting is noted, wait 24 hours and re-check. The surface will require repainting after cleaning if problems persist.

Mixing Instructions: Add fresh liquid household bleach (only sodium hypochlorite type of 5.25% concentration) to the fill line on the side of this container. Shake well. For other volumes, mix 1.5 parts MILDEW CHECK Wash to 1 part household bleach. It is important to use fresh household bleach. After cleaning longer than six months, bleach deterioration may not be sufficiently potent. DO NOT DILUTE WITH WATER. Use immediately after mixing. MILDEW CHECK Wash begins to lose its effectiveness after 2 hours and must be discarded.

Application: MILDEW CHECK Wash should be applied with the spray equipment recommended below. Spray the affected area from bottom to top liberally with mixed product. Bleaching action will occur within minutes. Allow to stand for 15-30 minutes. Rinse well with a garden hose, with nozzle pressure at maximum force. Rinse the surface with plenty of water. For very heavy mildew stains, the process may need to be repeated. Textured surfaces, such as stucco or rough masonry may require light scrubbing. MILDEW CHECK Wash does not remove embedded dirt.

Recommended Spray Equipment: Conventional steel spray equipment MUST NOT be used.

Large Area Applications - Solo brand with pressure release valve, optional air valve for air compressor and fan nozzle. Stainless steel Hudson® brand sprayers. Spray Dec® Sprayer models 20W, 20WP and 10W. RC Models 2001, 2002 and 2003.

Small Area Applications - Prover® Auto Sprayer.

Application Precautions: Washing surfaces, ladders and scaffolding which have become wet with MILDEW CHECK Wash or clean water may be slippery. Thoroughly rinse these surfaces to remove all traces of MILDEW CHECK Wash before using.

Apply only when product, air and surface temperatures are above 50° F (10° C).

Removal of MILDEW CHECK Wash is affected by temperature and humidity conditions. In warmer and/or drier weather additional rinsing will be required. If the temperature of the area to be cleaned is greater than 140° F (60° C), apply a light water mist before using. Before repainting, be sure MILDEW CHECK Wash has been thoroughly rinsed and wait 24-48 hours. Inadequate rinsing will affect new paint adhesion. Avoid contact with fabrics sensitive to bleach.

Clean-Up: Rinse spray equipment thoroughly with water.

Refer to Technical Data Literature for further information.

If ingestion, any type of overexposure or symptoms of overexposure occur during or following the use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN IMMEDIATELY; have label information available. KEEP OUT OF THE REACH OF CHILDREN. Emergency Medical or Poison Control Information: 204-640-1200.

ECR® Multi-Purpose Wash (263) is a mildewcid/algicidal formulated for cleaning and killing mold.

growth of Mildew and

ECR Multi-Purpose Wash differs from other cleaners by leaving a protective film to prevent its regrowth. This protection is long lasting and is water insoluble. Its effectiveness is even after new paint is applied, free of mold, mildew or algae from any applied paint.

Recommendations:

ECR Wash is formulated for use on surfaces when topcoated with any paint or stain. For best results, when used as a mildewcid/algicidal wash every 2 years or when mildew is visible.

SATISFACTION IS GUARANTEED

If you are not satisfied with this product, simply return the product to the store where you bought it, with proof of purchase, and we will refund your purchase price or replace with replacement product, your choice.
