APR 01 1997

NOTICE OF PESTICIDE:
 Registration
 Reregistration

Term of Issuance:
Conditional

Name of Pesticide Product:
Power Plant

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Blizzard System, Inc.
123 W. Torrance Blvd., Suite 203
Redondo Beach, California 90277

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label change before you release the product for shipment:

a) Revise the EPA Registration Number to read, "EPA Reg. No. 56625-3 and place this on the front panel of your labeling before EPA Est. No.

Signature of Approving Official:

William W. Jacobs
Acting Product Manager 14
Insecticide-Rodenticide Branch
Registration Division (7505C)

Date:

b) The signal word "Caution" must appear AFTER the "Keep out of reach of children" statement on your labeling.

c) Change the phrase "Environmental Protection" to "Environmental Hazards", and under "Environmental Hazards" add the statement "Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark" and change the statement "Do not contaminate...materials" to "Do not contaminate water when disposing of equipment washwaters".

d) You must remove the statement "This product is exempt from registration by the U.S. Environmental Protection Agency".

Submit one (1) copy of the final printed labeling for the record before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

William W. Jacobs
Acting Product Manager (14)

GOLD TREAT IS INTENDED FOR SALE TO AND USE BY PROFESSIONAL PEST CONTROL OPERATORS AND THEIR EMPLOYEES.
No guarantee or warrantee is given with this product. ~~This product is exempt from registration by the U.S. Environmental Protection Agency.~~
Please follow your State's regulations.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH IT'S LABELING.

Drywood Termite and Carpenter Ant infestations in structures: Apply a 100% solution to wood in structures to control infestations. For bare wood, topically apply a course spray at the approximate rate of one gallon per three hundred square feet of wood surface area. Spray will absorb into wood quickly. Additional sprays and or injection may be desired if large dimensional lumber is infested. For finished or inaccessible wood drill small holes into the infested wood in a regularly spaced pattern and inject under low pressure for up to one minute. Injection of insect tunnels may be made through "kick-out" holes, by drilling and directly into damage disclosed by probing of wood. Treatment of wall voids and similar areas where insects may nest can be made by drilling and using a crack and crevice tip under low pressure. Applications may be repeated as necessary.
