Immediately start the procedures given below and CONTACT A POISON CENTER, A
PHYSICIAN, OR THE NEAREST HOSPITAL. Describe the type and extent of
exposure, the victim's symptoms and follow the advice given.

If swallowed, immediately give several glasses of water but do not induce vomiting.

This material is corrosive. If vomiting does occur, give fluids again. Have a
physician determine if condition of patient will permit induction of vomiting or
evacuation of stomach. Do not give anything by mouth to an unconscious or
convulsing person.

For skin contact, under a safety shower, immediately flush all affected areas with
large amounts of running water for at least 15 minutes. Remove contaminated
clothing and shoes. Do not attempt to neutralize with chemical agents. Get
medical attention immediately. Wash clothing before re-use.

For eye contact, under a safety shower, immediately flush all affected areas with
large quantities of running water for a minimum of 15 minutes. Hold eyelids
apart during the flushing to ensure rinsing of the entire surface of the eyelids
with water. Do not attempt to neutralize with chemical agents. Get medical
attention as soon as possible. Oils or ointments should not be used at this time.
Continue the flushing for an additional 15 minutes if a physician is not
immediately available.

If inhaled, remove victim to fresh air. If not breathing, clear victim's airway and
start mouth-to-mouth artificial respiration. If victim is breathing, oxygen
may be given from a demand-type or continuous-flow inhaler, preferably with
a physician's advice. Get medical attention immediately.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage

CONTROL OF MICROBIAL ORGANISMS IN WATER SYSTEMS

PULP AND PAPER MILLS: For control of bacterial and fungal slime on pulp, paper, or paperboard machines, add 1.3 oz. - 6.6 oz. (avoirdupois) of H2O PRO MBT WSB per ton of paper or pulp produced (10 - 50 ppm of the product). Addition should be made at points in the system where adequate mixing will occur, such as raw stock chest, beater chest, refiner chest, wire-pitt, white water and broke system.

Badly fouled systems must be cleaned before a treatment program is started

COOLING TOWERS AND EVAPORATIVE CONDENSERS: For control of bacterial and fungal slime in commercial and industrial recirculating cooling water systems, initially make a daily addition of 2 to 8 ounces (avoirdupois) of H2O PRO MBT WSB per 1000 gallons of recirculating water (20 - 60 ppm of the product, based on the weight of water in the system). Continue application at this rate until control occurs. Then decrease rate to 0.66 oz. to 4.0 oz. of the product per 1000 gallons of water (5 - 30 ppm of the product) three times a week or as needed to maintain control. Add at a point in the system where adequate distribution will occur, such as the cooling tower basin or sump.

Badly fouled systems must be cleaned before a treatment program is started.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: When all packets are used, then dispose of empty foil package in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

STORAGE: Keep container tightly closed when not in use. Do not store near food or feedstuffs.
