DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GROUP 1: To control Ants, Armyworms, Brown Dog Ticks, Chiggers, Chinch Bugs, Clover Mites, Crickets, Cutworms, Earwigs, Fleas, Grasshoppers, Mole Crickets, Sod Webworms and Ticks, apply 200 lbs. per acre.

GROUP 2: To control Turfgrass (Hyperodes) Weevil, apply 400 lbs. per acre to problem areas in mid-April and again in mid-May or as recommended by your local Agricultural Extension Service Specialist for your area.

GROUP 3: To control White Grubs (European Chager and Japanese Beetle larvae only), apply 400 to 800 lbs. per acre when grubs are young and actively feeding near the soil surface, usually during late July and August or as recommended by your local Agricultural Extension Service Specialist for your area. Apply this product uniformly to home lawns and other ornamental and recreational turf gras areas using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear. To help obtain uniform distribution, apply one-half the required amount of product in one directions, then apply the balance at a right angle. Immediately after application sprinkle the turf with 1300 gallons of water per acre so as to wash the granules into the zone of insects infestation. Consult the following table to determine the amounts of this product and water required for smaller sized areas. Retreat as necessary.

| Area to be treated | Pounds of this Product to use: Group 1 | Pounds of this Product to use: Group 2 | Pounds of this Product to use: Group 3 | Gallons of water to sprinkle on turf after treatment |
