Gentlemen:

Subject: Security Snail and Slug Bait
EPA Registration No. 56644-20

This is in reference to your draft labeling submitted January 8, 1988 in response to the Methiocarb Registration Standard.

The labeling referred to above is acceptable provided that you submit five (5) copies of your final printed labeling incorporating the following corrections before you release the product for shipment.

1. Correct the name of the active ingredient in the ingredient statement to read as follows:

Methiocarb (4-methylthio-3,5-xylmethylcarbamate)

2. Please note that, in accordance with the methiocarb Standard, all commercial and agricultural uses of methiocarb are classified as restricted use pesticides. Additionally, the Standard imposed an interim 24 hour reentry interval for several uses including commercial turf. Your submitted labeling includes the unqualified claim for use on turf.

Therefore, to preclude possible use on commercial turf areas which would require the labeling restrictions described above, the use on turf must be qualified to denote use on home lawns only.

SNAIL & SLUG

56644-20

BAIT

CONTAINS MESUROL

KILLS SNAILS AND SLUGS IN ORNAMENTAL GARDENS AND TURF AREAS

ACTIVE INGREDIENT:

*3, 5-DIMETHYL-4-(METHYLTHIO)PHENOL METHYLCARBAMATE..... 2%

INERT INGREDIENTS: 98%

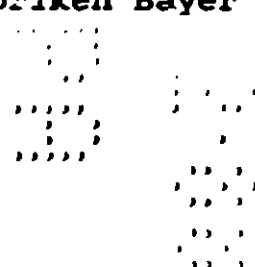

TOTAL 100%

CAUTION:

KEEP OUT OF REACH OF CHILDREN

(See additional precautionary statements on the back.)

Mesurool is a Reg. TM of the parent company of Farbenfabriken Bayer
GmbH, Leverkusen. U.S. Patent No. 3,313,684.

4015

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SECURITY SNAIL & SLUG BAIT is an easy-to-use pellet formulation that effectively controls slugs and snails in ornamental gardens and turf areas. Simply scatter the pellets directly from the container. For best results, water area to be treated prior to application. This product can be applied any time during the day, but late afternoon is preferred.

FOR ORNAMENTAL GARDENS, PLANTED BORDERS, AND GROUND COVERS: To control snails and slugs - Water area to be treated before application. Apply 1 pound to 1000 square feet. Scatter pellets uniformly over the infested area and around the edges of border or ground cover plants. Do not apply directly to plant foliage. Apply also to the bases of fences and walls and in shady protected areas. Repeat as necessary to keep areas free of slugs and snails. Do not put pellets in piles. Withhold heavy watering for at least 2 days after treatment. However, if foliage and soil surface become dry after application, a light sprinkling applied at dusk will encourage movement and increase feeding on the bait. Do not use around food crops.

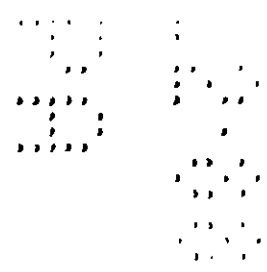

FOR TURF AREAS: To control snails and slugs - Water area to be treated before application. Apply 1 pound uniformly to 1000 square feet by scattering directly from the container or by using a granular applicator. Do not put pellets in piles. Withhold heavy watering for at least 2 days after treatment. After application, sprinkle turf lightly to wash pellets from foliage to soil. Keep children and pets off the treated area until it has dried.

IMPORTANT: Do not use on or around plants grown for food. Do not put pellets in piles. Scatter so that pellets are hardly visible on the treated area.

STORAGE AND DISPOSAL

Storage - Store in a dry area inaccessible to children.

Disposal - Do not reuse empty container. Wrap and put in trash.

505

**PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

May be harmful if swallowed, inhaled, or absorbed through the skin. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before re-use.

Do not contaminate feed or food. Keep out of reach of children and domestic pets.

If poisoning occurs, obtain prompt medical aid.

ANTIDOTE: Atropine sulfate.

This pesticide is toxic to fish and very highly toxic to birds. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water by cleaning of equipment or disposal of wastes.
