Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:

56872-1

Date of Issuance:

7

Terms of Issuance:

Unconditional

Name of Pesticide Product:

A-Maizing Lawn

NOTICE OF PESTICIDE:
 x Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Gardens Alive, Inc.
5100 Schenley Place
Lawrenceburg, Indiana 47025

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) sec. 3(c)(5) provided that you submit one (1) copy of your final printed labeling with the phrase "EPA Registration No. 56872-1" added to your label and update your Environmental Hazards statement to read "Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark" before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records. Refer to the A-79 enclosure for a further description of final printed labeling.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in normal, dry warehouse under ambient conditions.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

This product is a preemergence herbicide for use in controlling crabgrass, creeping bentgrass, smart weed, dandelions, redroot bigweed, purslane, lambsquarter, foxtail, barnyard grass, and Bermuda grass.

DIRECTIONS FOR USE:

Use on turfgrasses as a preemergence herbicide. DO NOT use on grass which as recently been sown. (Apply anytime after first mowing.) For crabgrass and other spring germinating weeds, apply 20 lbs. per 1,000 sq. ft. at the time forsythia begins to bloom in your area. As an alternate timing guide, apply when crocuses have finished blooming or when the first daffodils or jonquils begin to bloom. (To use bulb blooming times as a guide, bulbs must be located 15 ft. or more away from any foundation.) Although spring rains usually provide adequate moisture, you may want to water in A-Maizing Lawn following application. If you do water, water deeply and infrequently, allowing the soil surface to dry. To be most effective, A-Maizing Lawn requires a drying period. The soil surface should not be continuously wet. (As would be the case with automatic irrigation systems.)

How It Works:

Through an inhibitory process, which we do not yet fully understand, the Maize Gluten Meal in A-Maizing Lawn stops root development of germinating seeds. Since A-Maizing Lawn is an effective herbicide on a wide range of seeds, it is important to allow desired plants to become established before applying A-Maizing Lawn. Over-application, up to 40 lbs. per 1,000 sq. ft., will not harm your grass. In fact, the percentage of weed control increases as the application rate increases (up to 40 lbs./1,000 sq. ft.).

What It Is:

BEST AVAILABLE COPY

Maize Gluten Meal is a by-product of the wet milling process of making corn starch or corn syrup. Maize Gluten Meal is 60% protein and is widely used as a food ingredient for fish, poultry, horses, cattle, and in pet food. As A-Maizing Lawn decomposes, it makes nitrogen available to established grass. As a result, you should reduce or eliminate regular fertilization programs for at least 6 to 8 weeks after application of A-Maizing Lawn. If fertilization is to be applied at the same time as A-Maizing Lawn, the fertilizer should be low in nitrogen and higher in phosphorous and potassium. For example, an N-P-K of 0-6-6 or 2-6-6 would be acceptable if used in combination with A-Maizing Lawn.

There are no re-entry restrictions following use of A-Maizing Lawn. People, pets, and animals may use the lawn immediately following application.

LIMITED WARRANTY: Gardens Alive, Inc. makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions. If this product is defective, replacement product will be furnished free of charge or a refund of the product's cost will be made at manufacturer's option. Labor costs are not covered by this warranty. Responsibility for claims of any kind is strictly limited to the purchase price of this product.
