FEB 01 1990

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT
312 Pool Algaecide

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Max Chemical, Inc.
Calle La Brisa #6
Urban Industrial Sabana Llena
Rio Piedras PR 00924

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data

2. Make the labeling changes listed below when you reissue the product for shipment

- a. Add the word "Reregistration No. 57326-1"
- b. Include the following in the Contract:

to read:

Environmental Hazards

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

j. Revise:

DIRECTIONS

to read:

Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

k. Refer to PR Notice 83-3 and include appropriate Storage and Disposal instructions. Just a reminder to include subheadings:

**Pesticide Disposal
Container Disposal**

under the main heading: **Storage and Disposal.**

l. Delete the trade name: **Kleen Pool (3 locations).**

m. Revise:

The recommended use of Kleen Pool will control algae growth thus preventing undesirable algae growth odors and algae growth.

to read:

The use of this product will control algae growth and their odors.

n. Delete the word: **WARNING (left panel).**

BE AVAILABLE

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS

CLEAN POOL: Before filling, the sides and bottom should be scrubbed thoroughly making sure to remove stains and discoloration. All sides and bottom surfaces should be rinsed with clear water and all dirt floated away before closing drain valve.

BLUE POOL should be added on completion of the filling operation at the rate of one gallon per fifty thousand gallons of water (50 ppm). Add in several portions at different places and it will distribute itself evenly throughout the pool. The recommended use of Kleen Pool will control algae growth thus preventing undesirable algae growth odors and algae growth. If growing algae is visible it may be controlled by adding one gallon of Kleen Pool per 20,000 gallons of water. The killed algae is allowed to settle out and removed by vacuuming. This is followed by an added dose of one gallon of Kleen-Pool per 50,000 gallons of water every five to seven days to maintain between two and five parts per million active ingredient.

BLUE POOL is compatible with various other chemicals used for swimming pool water safety. The various chemicals should, however, be added separately to the pool as reaction might occur if they are mixed before diluting.

BLUE POOL is noncorrosive to fittings and will not affect paint and varnish used in the pool.

DANGER

Keep out of reach of children

MAY CAUSE EYE DAMAGE: Corrosive. Do not get in eyes. Causes skin irritation. Harmful or fatal if swallowed. Wear rubber gloves and goggles or face shield when handling.

FIRST AID: In case of contact, immediately flush eyes or skin with water. For eyes flush freely for at least 15 minutes and see a physician. Remove and wash contaminated clothing before reuse. If swallowed drink promptly a large quantity of milk, egg whites or gelatin solution, or if these are not available drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

FISH AND WILDLIFE: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Rinse empty container thoroughly with water and discard it.

WARNING: Do not use this product in or on electrical equipment due to the possibility of shock hazard.
