Jeremy Drudy EHS/Regulatory Specialist Haviland Consumer Products, Inc. 421 Ann St. NW Grand Rapids, MI 49504-2075

Subject: Label Amendment – Application to add Sanitizer Claim and Optional Marketing

Statements

Product Name: Durachlor Sticks EPA Registration Number: 57787-1 Application Date: October 1, 2018

Decision Number: 545286

Dear Mr. Drudy:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance

Page 2 of 2 EPA Reg. No. 57787-1 Decision No. 545286

with FIFRA section 6. If you have any questions, please contact Michael Varco by phone at 703-347-0403, or via email at varco.michael@epa.gov.

Sincerely,

Demson Fuller, Product Manager 32 Regulatory Management Branch II Antimicrobials Division (7510P) Office of Pesticide Programs

Enclosure

Note to Reviewer:

All italicized text is administrative and will not appear on final label.

All text in brackets [brackets] is optional and may or may not be included on final label.

DURACHLOR STICKS

Contains 90% available chlorine

[A Concentrate for Continuous Chlorination]

ACCEPTED

Master Label

Date: 10/01/2018

06/11/2019

Under the Federal Insecticide, Fungicide and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

57787-1

KEEP OUT OF REACH OF CHILDREN

DANGER

See additional precautions on [back] [side] panel

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. Chemtrec 1-800-424-9300.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Chemtrec 1-800-424-9300.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice. Chemtrec 1-800-424-9300.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Chemtrec 1-800-424-9300. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND DOMESTIC ANIMALS DANGER

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer system without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 464°F with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases. NEVER add water to product. Always add product to large quantities of water. Use clean, dry utensils. DO NOT add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with the generation of heat, liberation of hazardous gases, and possible fire or explosion.

IN CASE OR FIRE OR SMOKE: Call the fire department. Do not attempt to extinguish the fire without a self-contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. DO NOT use ABC or other dry chemical extinguishers since there is a potential for a violent reaction.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Master Label Date: 10/01/2018

{Pool maintenance direction, Option A}

For control of bacteria and algae (outdoors) in swimming pools operated continuously.

- 1.) Before bathing, test water pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 1-2 ppm. Use a chlorine stabilizer, especially outdoors to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm.
- 2.) Place sticks in skimmer basket or suitable feeder to maintain chlorine level between 1 to 2 ppm. If chlorine residual is too high or low adjust number of sticks in skimmer basket or make necessary adjustments of feeder to maintain proper level. Under normal conditions 1 or 2 ounces of this product daily for 10,000 gallons of pool water will maintain proper chlorine level. Do not place any other chemical with this product in the skimmer basket or feeder.
- 3.) Weekly, superchlorinate water 5 to 6 ppm using a suitable super chlorinating product. Follow directions of the product label for proper dosage. Avoid use of products such as body lotions that consume chlorine.
- 4.) Reentry into treated pool is prohibited above levels of 3 ppm of chlorine.

{Pool maintenance directions, Optional B

WATER BALANCE:

For best performance of this product, maintain pH between 7.2-7.6, total alkalinity 80-120 ppm, and calcium hardness 200-400 ppm. Test frequently using a reliable test kit or strip.

ROUTINE CHLORINATION:

Every week (or as needed): Add one 7 ounce [8 ounce] chlorinating stick for each 10,000 gallons of pool water to maintain chlorine residual at 1-3 ppm. Sticks may be placed into skimmer, however use of sticks in a floating dispenser or automatic chlorine feeder is recommended. Dosage may vary depending upon bather load, water temperature and other conditions. Pool must not be entered until the chlorine residual is 1-3 ppm as measured with a reliable test kit or strip. As a preventative treatment, pool water must be superchlorinated or "shocked" once a week to prevent common pool problems.

{Optional application and prohibitive statements}

METHOD OF APPLICATION:

- [1] [•] Use a floating dispenser, automatic chlorinator or feeder designed for this product[.] [, or place in skimmer.]
- [2] [•] Use in a new device which has previously contained only this product or whose active ingredient is trichloro-s-triazinetrione. [If placed in the skimmer, run the pump a minimum of 8 hours daily.]
- [3] [•] Do not reuse floaters of feeders from other dry chlorinating products.
- [4] [•] Do not permit sticks to contact plastic pool linings or metal objects.
- [5] [•] Do not throw sticks directly into the pool.
- [6] [•] Do not use with any other tablets or sticks in the same [skimmer,] floater or feeder.
- [7] [•] Do not use in any chlorinating device which has been used with any other chlorinating compounds

Durachlor Sticks Master Label Date: 10/01/2018

{Optional Marketing Statement}

[There are three important steps to follow to maintain sparkling clean water in your pool:]

[Step 1 – Add [[an] EPA registered] [sanitizer] [disinfectant]] [DURACHLOR STICKS {or} [specific related product*] {or} [this product] to control bacteria.]

[Step 2 – Add [[an] EPA approved] shock] {or} [specific related product*] to destroy contaminants.

[Step 3 – Add [[an] EPA approved] algaecide] {or} [specific related product*] to prevent algae before it starts.]

*Only specific EPA approved brand and product names may be displayed. For Example: Step 3 – Add ALGAE KIL 50

[All three steps are vital to achieve sparkling clean water.]

{Optional directions to determine capacity of pool water}

DETERMINE POOL CAPACITY:

To establish Pool Capacity follow this simple procedure:

Square or Rectangular Pools: Multiply length (ft.) X width (ft.) X avg. depth (ft.) x 7.5

Oval Pools: Multiply long diameter (ft.) X short diameter (ft.) X avg. depth (ft.) x 5.9

Round Pools: Multiply diameter (ft.) X diameter (ft.) X avg. depth (ft.) x 5.9]

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Keep this product dry in a tightly sealed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding the container.

Pesticide Disposal: Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse (or equivalent) promptly after emptying.
