## NEW FIRE RESISTANT DURACHLOR 56 CONCENTRATED POOL CHLORINE

- Features a dry chlorine that dissolves immediately
- A most effective germicide and algaeicide
- Will not cause cloudiness in water
- Will not add scale forming minerals in the water
- Will maintain your pool crystal clear
- Flame-resistant

The control of pH is greatly simplified using Durachlor 56 Concentrated Pool Chlorine. In fact, you will require from 1/2 to 1/3 the amount of acid usually applied. Durachlor 56 Concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains its strength regardless of storage time. It is economical to use in that after the pool is stabilized, you will need to apply Durachlor 56 Concentrated Pool Chlorine less often.

### INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To accomplish this, add 2 oz. Durachlor 56 Concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add Powdered Econochlor at the rate of 4 oz. per 1,000 gallons to stabilize the pool.

Durachlor 56 Concentrated Pool Chlorine should be added daily or as needed at the rate of 1/4 to 1/2 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of Durachlor 56 Concentrated Pool Chlorine per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 2.0 ppm range.

Keep in mind that a slight test kit margin will be maintained in the event of heavy accumulations of dust and dirt washed by storms or super heavy rainfall, which require additional savings as needed to maintain the chlorine residual between 1.0 ppm and 2.0 ppm.

## DANGER: KEEP OUT OF REACH OF CHILDREN

Keep this product out of the reach of children. This product is a strong oxidizing agent and may cause severe eye irritation. Avoid contact with eyes. If contact occurs, flush eyes with water for at least 15 minutes. If irritation persists, consult a physician. May be harmful if swallowed. Avoid contact with skin. May be harmful if inhaled. Avoid breathing dust. Avoid contact with clothing.

First Aid: In case of eye contact, flush eyes with water for at least 15 minutes. If irritation persists, consult a physician. If swallowed, do not induce vomiting. If inhaled, move to fresh air. If irritation persists, consult a physician.
