SUBSTANCES

Richard Westman
Haviland Consumer Products
421 Ann Street, NW
Grand Rapids, MI 49504-2075

Subject: Durachlor200
EPA Registration No. 57787-9
Application Date: March 1, 2006
Receipt Date: March 13, 2006

Dear Mr. Westman:

The following amendment submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is accepted with a conditions.

Conditions

1. This amendment is to re-insert use directions for spas/hot tubs and change the name of the product from Durachlor 200 to Durachlor 56 Granular. The Agency found no records of this product being registered for use in Hot Tubs. Please submit information to support this proposed use site.
2. The proposed name change is acceptable. Haviland Consumer Products already has an alternate brand name "Durachlor 56 Granular." This alternate brand name has been inactivated.

General Comments

A stamped copy of the labeling accepted with a condition is enclosed. Submit one copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please call Wanda Henson at (703) 308-6345.

Sincerely,

Emily H. Mitchell
Product Manager - Team 32
Regulatory Management Branch II
Antimicrobials Division (7510C)

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS
DANGER**

CORROSIVE: CAUSES IRRITATION OF EYE DAMAGE. MAY BE HARMFUL IF SWALLOWED OR ABSORBED THROUGH SKIN. Do not get on face, hair, clothing, hands, or feet. Do not get on clothing. Do not get on face, hair, clothing, hands, or feet. Wash thoroughly with soap and water after handling. Do not get on clothing and wash before reuse.

ENVIRONMENTAL HAZARD

THIS PESTICIDE IS TOXIC TO FISH AND AQUATIC ORGANISMS. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, creeks, or other waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of EPA.

PHYSICAL OR CHEMICAL HAZARD

STRONG OXIDIZING AGENT: Contact with oxidizing materials, including those oxidizing containing groups. Heating above temperatures above 421°F with elements of harmful gases. When heated, will burn with the color of chlorine and equally toxic gases.

DO NOT add water to product. **DO NOT** add product to large quantities of water. Use clean dry utensils. **DO NOT** add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Containers with incompatible contents, or other chemicals may have a chemical reaction with application of heat. Residual hazardous and possibly fatal to life.

IN CASE OF FIRE OR SPILLAGE: Call the fire department. Do not attempt to extinguish fire with water. Use approved breathing apparatus (SCBA) for fire fighting. Handle with caution amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential of violent reaction.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SWIMMING POOLS: When starting up a new pool, use enough to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To reestablish this, add 2 oz. of this product per 1,000 gallons of pool water.

This product should be added daily or as needed at the rate of 1/2 to 1/4 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6. A shock treatment should be made once a week during hot weather or after heavy use. Less frequent shock treatments may be made during cooler weather. After the shock treatment, add 2 oz. of this product per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has returned to the 1.0 ppm to 2.0 ppm range. Reentry into treated swimming pools is prohibited above a level of 3.0 ppm of chlorine.

SPAS & HOT TUBS: When starting up a new spa or hot tub, use enough to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To reestablish this, add 1/2 to 1/4 oz. per 1,000 gallons of spa or hot tub water. This product should be added daily or as needed at the rate of 1/2 to 1/4 oz. per 1,000 gallons of spa or hot tub water. To maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6. A shock treatment should be made once a week during hot weather or after heavy use. Less frequent shock treatments may be made during cooler weather. After the shock treatment, add 1/2 to 1/4 oz. of this product per 1,000 gallons of spa or hot tub water. Swimmers should not be permitted in the spa or hot tub after the shock treatment until the chlorine residual has returned to 1.0 to 2.0 ppm range. Reentry into treated spa or hot tub is prohibited above the level of 3.0 ppm of chlorine.

STORAGE AND DISPOSAL

STORAGE: Keep this product dry in a tightly sealed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames. In case of decomposition, use a container if possible and flood area with large amounts of water to dissolve all material before dispersing the contents.

DISPOSAL: Do not reuse empty container. Follow instructions of your local solid waste agency or 1-800-CLEANUP (254-9287) for proper disposal of empty container and unused product.
