ENVIRONMENTAL HAZARDS: THIS PRODUCT IS TOXIC TO FISH AND AQUATIC ORGANISMS. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

18oz.

This product is used to control the growth of algae in swimming pools, exterior spas, whirlpools, and hot tubs. For maximum effectiveness pools, spas, whirlpools, and hot tubs containing heavy growth of algae should be cleaned prior to using this product.

16oz.

For pools having just visible algae growth add an initial dose of 11 to 17 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool add initially 8 to 11 fluid ounces of this product per 10,000 gallons of water. Subsequent additions of 2 to 4 fluid ounces of this product per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

14oz.

Spas, whirlpools, and hot tubs having just visible algae growth require an initial dose of 1 to 2 fluid ounces of this product per 1,000 gallons of water. For treatment of a freshly cleaned spa, whirlpool or hot tub add initially 0.6 to 1.1 fluid ounces of this product per 1,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of this product should be made every 5 to 7 days after initial treatment for maintenance.

12oz.

This product will prevent growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 8 to 10 fluid ounces of algicide per 10,000 gallons of water. If at the end of swimming season pools have some visible algae growth, add 12 to 17 fluid ounces per 10,000 gallons. It is necessary that a uniform distribution of algicide throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

10oz.

This product is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. This product can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix this product with concentrated dry or liquid chlorine products.

STORAGE AND DISPOSAL

8oz.

STORAGE: Keep this product dry in a tightly sealed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding the container.

DISPOSAL: Do not reuse empty container. Disposal Instructions: Call your local solid waste agency or 1-800-CLEANUP (253-2687) for proper disposal of empty containers and unused product.
