Subject: Crystal Magic 2
EPA Reg.#: 57787-35
Notification Date: February 14, 2012
Receipt Date: February 14, 2012

Dear Ms. Bell:

This acknowledges the receipt of your emails of January 23 and February 14, 2012 in response to the Agency's initiated letter dated January 17, 2012, regarding the label Notification for an Alternative Brand Name "Crystal Magic 2" (EPA Reg#57787-35).

Proposed Notification:

A response to address EPA's letter noted above, regarding the justification to accept the originally requested ABN "New Wave Crystal Magic 2" for the Primary Brand Name "Crystal Magic 2" product (EPA Reg# 57787-35) dated December 22, 2011.

General Comment:

Based on the review of the material submitted, the notification application for an additional ABN "New Wave Crystal Magic 2" for the subject product is acceptable.

This notification and this letter have been inserted in your file for future reference.

If you have any questions on this letter, please contact David Liem by email at liem.david@epa.gov or call at 703-305-1284.

Sincerely,

Monisha Harris
Product Manager (32)
Regulatory Management Branch II

CONCURRENCES

SYMBOL	SURNAME	DATE					

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

DANGER:
Caution. Causes eye irritation, damage and skin burns. Do not get in eyes, on skin or clothing. Wear protective clothing and rubber gloves when handling this product. Wear goggles, face shield, and safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the restroom. May be fatal if swallowed. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARDS
Strong oxidizing agent. Mix only with water. Use only clean, dry quantities mixed or diluted each time product is taken from the container. Do not add this product to any dispensing device containing contents of any other product. Such use may cause violent reactions leading to fire or explosion. Contamination with moisture, acids, organic matter, other chemicals or easily combustible materials such as petroleum or paint products may cause a chemical reaction with generation of heat, liberation of hazardous gases, or possible generation of fire or explosion. In case of contamination or decomposition, do not reassemble container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.
Pesticide Storage: Keep this product dry, in its original unopened bag until use. Store in a cool, dry, well-ventilated place. Keep away from heat sources, sparks, open flames and lighted tobacco products. Use only a clean dry second grade metal or plastic such that this product is taken from the bag.
Pesticide Disposal: Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.
Container Disposal: Non-refillable container. Do not reuse or refill this bag. Completely empty bag into application equipment. When completely empty, offer for recycling, if available.
In Case of Spill or Leak: Use extreme caution. Contamination may cause fire or violent reaction. If fire or reaction occurs in area of spill, dispose with plenty of water. Otherwise sweep up spilled material using a clean, dry shovel and broom and dispose spilled material in water. Then immediately use solution as directed.
In Case of Fire: Drench with water. Calcium hypochlorite liberates oxygen, therefore, attempts to smother fire with a wet blanket, carbon dioxide, or a dry chemical extinguisher are ineffective.

Crystal Magic 2

Shock Treatment Kills Bacteria and Controls Algae. Restores a Crystal Clarity to Pool Water and Enhances Water Quality.

ACTIVE INGREDIENTS:

Calcium hypochlorite.....	47.6%
Sodium tetraborate pentahydrate.....	20.0%
OTHER INGREDIENTS.....	32.4%
TOTAL.....	100.0%

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information call CHEMTREC at 1-800-424-9300.
If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

**KEEP OUT OF REACH OF CHILDREN
DANGER**
See additional precautionary statements on back panel.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Swimming pool water is subject to a build-up of a wide variety of organic contaminants including swimmer wastes, such as perspiration and lotion. If left untreated, the build-up of these contaminants could lead to the development of cloudy problems. This product will effectively reduce contamination in swimming pool water, making the water clear and inviting.

When using other products in conjunction with this product, follow the instructions on those products. NEVER mix different products together in the same bucket or pail. Backwash or clean filter according to manufacturer's instructions. Test pH and adjust to 7.2 - 7.6. If chlorine is the primary sanitizer, increase cyanuric acid levels to 30-50 ppm. Continuously run the circulation pump prior to applying this product. Treatment should be done at night or during a period when the pool is not in use. Do not enter the pool until the free chlorine residual has dropped below 3.0 ppm.

Shock Dose Instructions: Using other Application Methods A or B, add 8 oz. of this product to every 5,000 gallons of water weekly. Apply frequently after heavy rain, high temperatures, and/or heavy bather loads.

Depending on the pool surface type and water temperature, there are two suggested methods for applying this product. Method A should be used if water temperatures are below 65°F or if the pool has bioactive surfaces such as vinyl, painted plaster or concrete. For all other applications, use Method B.

Application Method A: Use a clean plastic bucket or pail and fill with clean water. Add this product to the bucket or pail of water. Use a clean wood or plastic spoon to stir the water. Never add more than 1 pound of this product to 3 gallons of clean water. NEVER place this product in a pail and add water to the product. This product must be added to water. Once product has dissolved pour the solution around the edge of the pool with the circulation pump on.

Application Method B: With the circulation pump on, place the container close to the surface of the pool, and broadcast the product over the water surface in the deep end of the pool. Use a pool brush on surfaces if the product settles on bottom of pool surfaces. Never allow undissolved product to rest in contact with pool surfaces.
