## ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is not cleared for use in paper or adhesives which may come into contact with food. SUTTOCIDE A 50% SOLUTION should not be used in products where prolonged human dermal contact is expected or which may come in direct contact with food.

Products containing SUTTOCIDE A 50% SOLUTION may not make claims of antimicrobial activity other than protection of the article itself against growth of bacteria and mold in the treated article. If growth of bacteria and fungi in the treated article would lead to unpleasant odors and discoloration of the treated article, then such a claim may be made.

SUTTOCIDE A 50% SOLUTION is a biocidal agent used to inhibit the growth of bacteria and fungi. It is for indoor commercial and industrial use and is generally effective at concentrations of 0.1% to 0.5% (2 to 10 gallons of SUTTOCIDE A 50% SOLUTION per 1,000 gallons of the product being treated. This will yield 1,000 to 5,000 ppm of active ingredient). The concentration of SUTTOCIDE A 50% SOLUTION necessary for adequate preservation will depend on a variety of factors including the use of other raw materials which may provide nutrients for bacterial growth. To determine more precise application rates, all products should be subject to microbial challenge testing.
