### FOR PROFESSIONAL USE ONLY

TRUBAN® is a soil fungicide for control of damping off, root and stem rot diseases caused by *Pythium* and *Phytophthora*. It may be used at time of seeding and transplanting either as a soil mix or as a drench for control of these problem fungi in greenhouses and outdoors.

TRUBAN suspensions in water should be constantly agitated to assure uniform application of material. TRUBAN suspensions need not be protected from light. Use at recommended rates. Overdosage may result in toxicity to sensitive plants. If plants are suspect of being sensitive, apply fungicide to a small number to insure safety. TRUBAN should not be mixed with other pesticides or nutrients.

Thoroughly rinse TRUBAN residues out of all equipment after use.
