Mr. Kim L. Smith
Campbell Chemicals, Inc.
1664 Headland Drive
St. Louis, MO 63026

Dear Mr. Smith:

Subject: Professional Strength Flying and Crawling Insect Killer
EPA Registration No. 58284-5
Your Submission Dated November 24, 1987

Your labeling is basically acceptable except for the following:

1. Two zeros should be placed in front of each of the percentages on your ingredient statement.
2. Delete the second "Caution" on your label, as it is not needed.
3. Your labeling appears too cluttered (see enclosed sample label).

Your labeling makes reference to areas that are clearly designated as U.S. Department of Agriculture (USDA) meat and poultry processing plants. Before we can give your product further consideration for conditional registration, you must either:

1. File a separate application with USDA to obtain approval in such processing plants, in which case the label wording should be changed to reflect USDA acceptance, or
2. Qualify your site designation to exclude USDA meat and poultry processing plants.
