

NOTICE OF PESTICIDE REGISTRATION REREGISTRATION
(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)

Swine Feed Contains Rabon Oral Larvicide

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Wendland's Farm Products, Inc.
405 South 2nd Street
P.O. Box 40
Temple, TX 76503

160 / 212 361
141 / 2

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment:

- a. Add the phrase "EPA Registration No. 58349-4."
- b. The phrase "Contains Rabon Oral Larvicide" should be part of the product name to denote that the product is a pesticide in addition to being a feed.
- c. The words "ACTIVE INGREDIENT(S)" and "INERT INGREDIENT(S)" must be printed in type of the same size and be given equal prominence. The words "ACTIVE INGREDIENT(S)" AND "INERT INGREDIENT(S)" must be aligned to the same margin.
- d. Change INGREDIENTS to FEED INGREDIENTS.

- or equipment used.
- f. Change DIRECTIONS for Use to DIRECTIONS for Use.
 - g. Use the full product name on this product within the DIRECTIONS for Use.
3. Please provide the SMIL or Location Number for the analytical methods, not the Pesticide Petition No. AHS047.
4. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

George T. LaRocca
Product Manager (IS)
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

Enclosures

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

58349-4

SWINE FEED

as Rabon[®] Oral Larvicide)

in manure of treated swine. Prevents the manure of treated swine.

ACTIVE INGREDIENT

	<u>by Weight</u>
2-Chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphate	0.0026% *
Inert Ingredients	99.9974% **
TOTAL	100.0000%

*Contains 11.804 milligrams of Rabon per pound.

**Refers only to ingredients which are not larvicidal.

GUARANTEED ANALYSIS

Crude Protein, minimum.....	16.00%
Crude Fat, minimum.....	3.00%
Crude Fiber, maximum.....	4.30%

INGREDIENTS

Grain products, plant protein products, processed grain by-products, forage products, animal protein products, calcium carbonate, monocalcium phosphate, salt, molasses product, l-lysine, vitamin A supplement, d-activated animal sterol (source of vitamin D3), vitamin E supplement, choline chloride, vitamin B-12 supplement, riboflavin supplement, niacin supplement, d-calcium pantothenate, menadione sodium bisulfite complex, thiamine mononitrate, d-biotin, folic acid, pyridoxine HCl, manganese oxide, zinc oxide, ferrous sulfate, copper sulfate, ethylenediamine dihydriodide, and sodium selenite.

KEEP OUT OF REACH OF CHILDREN

CAUTION

Precautionary Statements
Hazards to Humans

CAUTION: Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water. If irritation persists, see a physician.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE and DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a dry place in original container.

CONTAINER DISPOSAL: Completely empty bag of contents. Then dispose of empty packaging in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Pesticide Disposal: Wastes resulting from the use of this may be disposed of on-site or at an approved waste disposal facility.

DIRECTIONS FOR FEEDING USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Rations containing this product may be fed up to slaughter with no withdrawal. Wendland's Swine Feed is a complete hog feed to be fed ad libitum, but no less than 4.25 lbs. per 100 pounds of body weight.

Start feeding Rabon larvicidal feeds early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall until cold weather restricts fly activity.

When fed, this product passes through the digestive system into the animal's manure where it kills fly larvae on contact shortly after fly eggs hatch.

It prevents the development of fly larvae in the manure of treated animals, but is not effective against existing adult flies.

In some cases, supplemental fly control measures may be needed in and around cattle lots and barns to control adult house flies and stable flies which can breed not only in manure but in other decaying vegetable matter or silage on the premises.

In order to achieve optimum fly control, this product should be used in conjunction with other good management and sanitation practices.
