Mr. Walton F. Suchanek  
 Stellar Manufacturing Company  
 1647 Saugat Industrial Blvd.  
 Saugat, IL 62206

Subject: Stellar Three Inch Tablet  
 EPA Registration Number 58401-13  
 Application Date: 10/13/05  
 Receipt Date: 11/07/05

Dear Mr. Suchanek:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the conditions listed below:

- To add a new supplier (See CSF dated 11/30/05).
- Modify the active ingredient section of the label to reflect the purity of the trichloro-s-triazinetriene of the new supplier and the addition of a tablet release agent (boric acid).

**Conditions**

Revise the label as follows:

- Place the "EPA Registration Number 58401-13" on your label.
- Revise the "Environmental Hazards Statement" to read:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA".

## **General Comments**

The revised basic confidential statement of formula (CSF) dated 11/30/05 supersedes all previously accepted basic formulas.

A stamped copy of the accepted labeling is enclosed. Submit three (3) copies of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact me at (703) 308-6372.

Sincerely,

Emily H. Mitchell  
Product Manager  
Regulatory Management Branch II  
Antimicrobials Division (7510C)

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND TO DOMESTIC ANIMALS

**DANGER.** May be fatal if swallowed. Avoid breathing dust, inhaling to nose and throat. Highly corrosive. Do not get in eyes, on skin or on clothing. Causes eye and skin damage. When handling wear goggles or face shield and rubber gloves. Wash thoroughly with soap and water after handling and before eating and smoking. Remove contaminated clothing and wash before reuse.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of EPA.

### PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean dry utensils. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseat container. If possible isolate each container in open air or well-ventilated area. Flood with large volumes of water if necessary.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **SWIMMING POOLS:** It is recommended that the pool be stabilized with a cyanuric acid stabilizer to nullify the disinfection effect of sunlight on chlorine. When using Perfect Dose™ Tablets, both chlorine and cyanuric acid stabilizer are being added to the water. However, it is necessary to first stabilize pools with a cyanuric acid stabilizer to effectively maintain the desired concentration. Follow the directions on the label for that product.

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.2 and 7.4. It is necessary that the pool be super chlorinated before using Perfect Dose Tablets so that a free chlorine residual of between 1.0 and 3.0 is obtained. Genuine Perfect Dose™ Tablets are Manufactured To Exact Specifications For Use With The Perfect Dose Chlorination System (U.S. Patent No. 6,911,606) In Your Swimmer. To use detach the handle from the shaft/spine by rotating the bottom half of the handle 90 degrees and pulling the handle straight up. Stack the Perfect Dose Tablets to just below where the handle attaches. Adjust the height of the tablets by rotating the handle clockwise to lower and counter clockwise to raise. Adjust the Perfect Dose Feeder to assure consistent treatment level of 1.0 to 2.0 ppm free available chlorine in the pool water (normally 1 - 2 oz of this product per 10,000 gallons daily). (Each Perfect Dose Tablet weighs approximately seven

oz)

Tablets may also be used in various types of swimmers, floaters, propellerizing mechanisms, or fenders. Never add Perfect Dose Tablets directly to a pool. Adjust whatever feeding mechanism is used, to assure consistent treatment level of 1.0 to 2.0 ppm free available chlorine in the pool water (normally 1 - 2 oz. of this product per 10,000 gallons daily). (Each Perfect Dose Tablet weighs approximately seven oz.). The regular use of a free chlorine test kit will determine if further adjustments may be necessary to meet the recommended level of free available chlorine in the pool water. A shock treatment should be made every week during hot weather or after heavy rain. Less frequent shock treatment may be made during cool weather. For the shock treatment, add a fast dissolving chlorine according to the label directions for that product. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual is below 3.0 ppm.

### STORAGE AND DISPOSAL HOUSEHOLD:

**STORAGE:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve material before discarding. **DISPOSAL:** Do not reuse original container. Securely wrap original container in several layers of newspaper and discard in trash.

### COMMERCIAL:

**STORAGE:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve material before discarding. **PESTICIDE DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Pesticides wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or fixative is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum is contaminated and cannot be reused, dispose of in the same manner.

### NOTICE TO BUYERS

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal use conditions or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use. Seller disclaims all other warranties, expressed or implied, including any warranty of fitness or merchantability.
