Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Minor Labeling Revisions
Product Name: LO-CHLOR POOL ALGICIDE
Admin Number: 58412-1
EPA Receipt Date: 07/23/2024
Action Case Number: 00623224

Dear Rebecca Mannion:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Terria Northern via email at northern.terria@epa.gov.

Sincerely,

Terria Northern, RM Team 33

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DOSAGE RATES:

EVERY THREE MONTHS: 16 fl. oz. [brand] [this product] per 10,000 gallons pool water (or 500 ml per 40,000 L) will prevent algae growth in all pool types.

SEVERE ALGAE TREATMENT: 32 fl. oz. [brand] [this product] per 10,000 gallons pool water (or 1 [Liter] [L] per 40,000 L).

GENERAL DIRECTIONS:

1. Maintain pool water in the pH range 7.2 to 7.8. Adjust pH to 7.2 for severe algae.
2. Ensure that filtration system is working properly and that filtration cycle is adequate.
3. A regular brushing program will assist in the removal of stubborn algae.
4. Calculate the volume of [brand] [this product] required for your pool.
5. Add the product directly to the pool, distributing over as wide an area as possible.
6. While [brand] [this product] controls algae, it is important that adequate levels of sanitizer (chlorine) be maintained to control bacterial growth

{{Household/Residential Containers}}

STORAGE AND DISPOSAL

Store in original container, tightly closed in a cool, dry place out of the reach of children and persons unfamiliar with its use. Do not store in direct sunlight. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If not, discard in trash.

{Optional alternative "Container Disposal" statements}

(For nonrefillable container)

Keep this product in its tightly closed container when not in use. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

(For refillable container)

Keep this product in its tightly closed container when not in use. Do not contaminate food or feed by storage or disposal or cleaning of equipment. Refillable container. Refill this container with Copper Triethanolamine Complex only. Do not use this container for any other purpose. Rinse empty container thoroughly with water prior to disposal.

{{Commercial Containers}}
