**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION

Harmful if swallowed. Avoid breathing vapors. Avoid contamination of food and feed. Avoid prolonged skin contact.

ENVIRONMENTAL HAZARDS

Do not apply directly to water or wetlands.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store only in original container in a dry, well-ventilated place inaccessible to children and pets.

DISPOSAL: Do not reuse empty container. Rinse thoroughly. Securely wrap in newspaper and discard in trash.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SNAKES

USE RESTRICTIONS: FOR OUTDOOR USE ONLY. APPLY ONLY AS DIRECTED ON LABEL. To repel rattlesnakes (Genus *Crotalus*) and checkered garter snakes (*Thamnophiamarcianus*) from areas around houses, cabins, trailers, garages, utility houses, barns, woodpiles, sand piles, trash cans, and flower beds. May also be used around the periphery of gardens. Do not use this product at sites where snakes are believed to be already present as the deterrent effects of the product might tend to confine snakes to the treated areas.

Do not apply this product in gardens or in fields of crops grown for food or feed. Do not use this product near streams, ponds, pools, or water supplies.

Tests of this product have suggested that it can be an effective deterrent for the type of snakes listed above. While the product might deter other types of snakes as well, it is not expected to consistently repel snakes of the following types: corn snakes and other rat snakes (Genus *Elaphe*), and "moccasin" snakes such as cottonmouths and copperheads (Genus *Agkistrodon*.)

APPLICATION DIRECTIONS: Using gloves, apply SNAKE-A-WAY in bands surrounding the area to be protected. Use bands 4 to 5 inches wide to repel checkered garter snakes. For rattlesnakes, use bands 8 to 12 inches wide. In yards, lightly sprinkle SNAKE-A-WAY over the areas within the treatment band

When the odor of SNAKE-A-WAY becomes faint, its effectiveness may be diminished. If this occurs during a season when snakes are active, retreat with enough of the product to restore the original odor intensity. Retreatment may also be necessary after heavy rains.

RATS AND MICE:

USE RESTRICTIONS: FOR OUTDOOR USE ONLY. APPLY ONLY AS DIRECTED ON LABEL. This product may be used to limit damage by house mice (*Mus musculus*), Norway rats (*Rattus norvegicus*), or roof rats (*R. Rattus*) to garbage bags placed near residences and other buildings or to garbage bags placed along streets or alleys for garbage collection.

Do not use this product in gardens or in fields of crops grown for food or feed.

Do not use this product near streams, ponds, pools, water supplies, or sewers.

APPLICATION DIRECTIONS: Using gloves, apply SNAKE-A-WAY, in a lightly sprinkled band around the area where garbage bags are placed. Beginning no more than one foot out from the outermost bags, lightly broadcast SNAKE-A-WAY until a band of product 24 inches wide circles the bags.

When the odor of SNAKE-A-WAY becomes faint, its effectiveness may be diminished. Retreatment may also be necessary after heavy, washing-type rains.

NOTICE: Buyer assumes all risk of use, storage, and handling of this material not in strict accordance with label directions.
