SUBJECT: Amendment- Revise Precautionary Text
DIE NO MITE STRIP
EPA Registration Number: 58639-5
Your Letter Dated February 18, 2004

Dear Mr. Sonleitner:

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable provided that you make the labeling changes indicated below prior to release for shipment of product bearing the amended labeling:

1. Change "Statement of First Aid Treatment" to "First Aid."

We note that the sales literature will be revised in accordance with comments four (4) of our February 5, 2004 letter.

Submit two (2) copies of your final printed labeling before you release the product for shipment. A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager 13
Insecticide Branch
Registration Division 7505C

Enclosure

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Avoid contact with skin. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

STATEMENT OF FIRST AID TREATMENT

IF ON SKIN: Rinse skin immediately with plenty of water for 15-20 minutes. Consult a poison control center or doctor for treatment advise.

IF IN EYES: Flush with plenty of water.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water. Do not contaminate water by disposal of used strips. Use this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Directions for Use in Poultry Houses: Caged Layer: Use the enclosed clip to attach strip at a cross-wire, one third distance from front of every cage of up to five (5) birds as an aid in the prevention and control of the Northern fowl mites and lice in poultry. Wear protective gloves when attaching strips to cages. Control of heavy mite infestations may require use of more than one strip per cage of five (5) birds for one to three months.

Breeder Use: Use the enclosed clip to suspend strip center front of each nest hole. Add one additional strip for each five (5) roosters, strategically placed, where rooster will have daily contact. Properly positioned strips will prevent mites and lice for up to two (2) years.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL:

Remove strips when cleaning cages. Securely wrap used strips in a plastic bag or several layers of newspaper and discard in trash.

CONTAINER DISPOSAL:

Dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and Local authorities, by burning. If burned, stay out of smoke.
