SkeetalTM 58998-3

Flowable Concentrate

FOR MOSQUITO AND BLACKFLY LARVAL CONTROL

KEEP OUT OF REACH OF CHILDREN

CAUTION

If in eyes, flush with plenty of water. Get medical attention if irritation persists.

ACTIVE INGREDIENTS	<i>Bacillus thuringiensis israelensis</i> (H14) 600 International Toxic Units per milligram of formulation	15%
	Equivalent to 1500 I.U. (AA Units)	
	Inert Ingredients	85%
	Total	100%

PRECAUTIONARY STATEMENTS	Avoid contact with Eyes, Skin, or Clothing. Wash thoroughly with soap and water after handling.
--------------------------	---

PRACTICAL TREATMENT	If on skin, wash with soap and water. If in eyes, flush eyes with water until any irritation has stopped. If inhaled, remove victim to fresh air. If swallowed, drink one or two glasses of water.
---------------------	--

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. SKEETAL is a larvicide dependent upon the presence of a selective natural toxin which when eaten by the mosquito or blackfly larvae breaks down in the insect's gut. Paralysis and death follow normally within 4-8 hours, control being complete within 24 hours. The natural toxin has been shown to be an effective pesticide against over 30 species of mosquito larvae and several species of blackfly (*Simulium* spp.). Among the mosquitoes controlled are those belonging to the genera *Aedes*, *Anopheles*, *Culex*, *Culiseta*, *Psorophora*, and *Wyeomyia*, and *Uranotaenia*. In most cases, 1st to 3rd instar larvae are the most susceptible, although 4th instar can be controlled.

Shake the container before use. Partially fill the spray tank with water, add required volume of SKEETAL, stir and continue filling the tank. For maximum efficiency, the mixture should be used the same day. Application can be made using any standard spray equipment, and in any volume of water suitable for adequate coverage. For aerial application, apply neat or diluted with water to preference.

SKEETAL is exempt from the requirements of a tolerance on raw agricultural commodities. Applications to irrigation water are permissible. SKEETAL may be used in residential areas.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal of waste.

Storage: Store in a cool, dry place. Keep containers tightly closed when not in use. Store at temperatures above freezing and below 32 degrees C (90 degrees F).

Pesticide Disposal: Pesticide waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility in accordance with federal and local regulations.

Container Disposal: Triple rinse (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

APPLICATION RATES:

Mosquitoes	Location	Rate (pts/acre)
Larvae	Clean water: flood water, ponds, ditches, tidal water, salt marsh, catch basins, storm water retention areas, curb gutters in residential areas	0.5-2.0
	Polluted waters, e.g. sewage and water high in organic matter content	2.0-4.0
Blackflies	Location	Apply
Larvae	Application made upstream SKEETAL mixed with up to 3-5 times its own volume of water	10 to 50 milligrams SKEETAL FC per liter of water flowing downstream per minute (1.2-6.4 oz per 1000 gal of water per minute). Apply to assure a minimum of one minute of exposure of the larvae.

WARRANTY NOTICE: All goods supplied by NOVO BioKontrol are of high grade and we believe them suitable for the purposes recommended but, as we cannot exercise control over their storage or use, no responsibility will be accepted by us for any damage or injury, whatsoever arising from their storage, handling, application or use.
