

US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS 767) WASHINGTON DC 20460	EPA REGISTRATION NO.	DATE OF ISSUANCE <b>APR 20 1989</b>
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT	

**NOTICE OF PESTICIDE:**  REGISTRATION  REREISTRATION  
*(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)*

NAME AND ADDRESS OF REGISTRANT *Include ZIP code*

**NOTE** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

ACCEPTED with COMMENTS in EPA Letter Dated

APR 20 1990 Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. 59074-1

DIRECTIONS FOR USE GENERAL CLASSIFICATION

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. DIRECTIONS FOR SWIMMING POOL CHLORINATION

HYPOCHLOR

PRECAUTION HAZARD AND DANGER

UN 1791 HYPOCHLORITE SOLUTION

"FOR SWIMMING POOL CHLORINATION AND SANITIZING"

ACTIVE INGREDIENT: SODIUM HYPOCHLORITE 8.0% INERT INGREDIENTS 92%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention if swallowed, drank large quantities of milk or got it in solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

DANGER: Corrosive chemical burns to broken skin, eyes, or on clothing. Wear goggles or this product. Wash after hand ventilated areas as soon as possible.

ENVIRONMENTAL: This pesticide is toxic. Treated effluent may not be discharged to public waters without the approval of the regional office of the EPA.

PHYSICAL HAZARDS: 3

AGENT: Mix only with water. Do not mix with other products with gross filter such as detergents or other chemicals in lungs and mucous membranes.

SLACK C 465 S Glim GARTHAG (3)

EPA REG. NO.

For a new pool or for spring start-up, superchlorinate with one (1) part (16 fl. oz.) of sodium hypochlorite solution for each 2500 gallons of water. The dosage is equivalent to 3 ppm available chlorine by weight.

For Pool Maintenance

A. Adjust pool water pH to 7.4 - 7.6 range and maintain.

B. Add manually or by a feeder device the sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.8 to 1.0 ppm. One-half pint (8 fl. oz.) of the sodium hypochlorite solution of each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.8 to 1.0 ppm available chlorine will depend on temperature and number of swimmers. Use test kit to make certain pH and chlorine residual are in the proper range.

DIRECTIONS FOR DISINFECTION OF POTABLE WATER AT WATER TREATMENT FACILITIES

Use the sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 9 parts softened water. Mix sodium hypochlorite solution and water thoroughly and begin feeding of solution with a hypochlorinator metering pump. Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.8 ppm throughout the distribution system as determined by DPD chlorine test kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the National Sanitation Primary Drinking Water Regulations. Check water quality with a DPD chlorine test kit.

For more information, contact your local health Department for further details.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner just before using. Use a surface thoroughly with the sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one fluid oz. (2 tbsp.) of the sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: The product degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL:

Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in leak collector or burying in an approved landfill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

STORE IN UPRIGHT POSITION.
