BIO•CLEAR 1000

DRAFT

A MICROBIAL BACTERICIDE, FUNGICIDE, ALGAECIDE AND SLIMICIDE IN TREATING NON-MARINE, OIL FIELD DRILLING AND RECOVERY APPLICATIONS

ACTIVE INGREDIENT: 2,2-Dibromo-3-propionamide.....97.6%
OTHER INGREDIENTS.....2.4%

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT

- If in eyes: Flush eyes immediately with plenty of water for at least 15 minutes and get medical attention at once.
- If on skin: Wash with soap and plenty of water. Wash contaminated clothing before reuse.
- If inhaled: Remove person to fresh air immediately. Get him quiet and warm; apply artificial respiration if necessary. Get medical attention at once.
- If swallowed: Induce vomiting immediately by giving two glasses of water and sticking finger down throat. Repeat until vomit is clear. Call a physician. Never give anything by mouth to an unconscious person.

WASH THOROUGHLY AFTER HANDLING

See side panels for additional precautionary statement.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE
CAUSES SEVERE BURNS OF EYES
EYE CONTACT MAY CAUSE LOSS OF VISION
IRRITATING TO NOSE AND THROAT
MAY BURN THE SKIN • MAY BE FATAL IF SWALLOWED

Do Not Breathe Dust. Do Not Get in Eyes, on Skin, or on Clothing. Impact-resistant Goggles with Side-shields, or Face Shield, and Rubber Gloves Must be Worn when Handling. Use with Adequate Ventilation.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

CHEMICAL AND PHYSICAL HAZARDS

Reaction with strong reducing agents may be explosive. Avoid comminution and dust.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in dark, cool, dry, well-ventilated area, not above 40°C, in well-closed original containers, away from energy sources, combustible organic materials, oxidizers and moisture. When handling, or dealing with spills, use impact-resistant goggles with side-shields, or face shield; wear body-covering clothes, including impervious rubber gloves and boots; use a dust respirator.

DRAFT

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

SPILLS: Cover wet spills with 10% sodium bicarbonate solution, water and then add an inert absorbent before sweeping up and disposing as described for pesticide disposal. If drum contents are contaminated or decomposing, isolate unsealed drum in the open or in a well ventilated area; flood with 10% sodium bicarbonate solution and large volumes of water if necessary.

Right Panel

NON-MARINE, ENHANCED OIL RECOVERY SYSTEMS

For controlling slime-forming bacteria, sulfide-producing bacteria, yeast, and fungi in oil field water, polymer of micellar floods, water-disposal systems or other oil field water systems, add 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water) depending on the severity of contamination.

Continuous Feed Method

When the system is noticeably fouled, add 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water) continuously until the desired degree of control is achieved. Subsequently, treat with 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water) continuously or as needed to maintain control.

Intermittent of Slug Method

When the system is noticeably fouled, or to maintain control of the system, add 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water) intermittently for 4-8 hours per day, and from 1-4 times per week, or as needed depending on the severity of contamination.

Addition of Bio•Clear 1000 may be made at the free water knockouts, before or after the injection pumps and injection well headers.

NOTE: For control of bacteria, yeast, and fungi in aqueous solutions of biopolymer used in flooding operations, add 6-54ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water).

COMPLETION AND WORKOVER FLUIDS

Bio•Clear 1000 antimicrobial should be added to a completion and workover fluid at a point of uniform mixing such as a circulating tank. Add antimicrobial 6-54ppm (0.2-1.9 pounds per 100 barrels of fluid) to freshly prepared fluid depending on the severity of contamination. Circulate the workover fluid system until the fluid returns clear, shut the system down and idle for several hours. Remove the workover fluid. The well should be ready for productive use.

DRILLING MUDS

Bio•Clear 1000 antimicrobial should be added to a drilling fluid system at a point of uniform mixing such as the circulating mud tank.

INITIAL TREATMENT: Add 6-54 ppm (0.2-1.9 pounds per 100 barrels of fluid) to a freshly prepared drilling fluid depending on the severity of contamination.

MAINTENANCE DOSAGE: As the total volume of the system increases due to increased well depths, maintain 6-54ppm level by adding 0.2-1.9 pounds per 100 barrels of additional fluid or as needed, depending on the severity of contamination.

ACCEPTED

MAR 11 1998

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No. 59106-1

PACKER FLUIDS

Bio•Clear 1000 antimicrobial should be added to a packer fluid at a point of uniform mixing such as a circulating holding tank. Add 6-54 ppm antimicrobial (0.2-1.9 pounds per 100 barrels of fluid) to a freshly prepared fluid depending on the severity of contamination. Seal the treated packer fluid in the wall between the casing and production tube.

WATER FLOODS

Bio•Clear 1000 should be added to a flood water system at a point of uniform mixing such as the area of addition to make up water to the holding tank.

INITIAL TREATMENT: When the system is noticeably contaminated, add 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels of water). Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 6-54 ppm Bio•Clear 1000 (0.2-1.9 pounds per 100 barrels flood water) weekly, or as needed to maintain control.

DO NOT SHIP WITH FOOD, FEEDS, DRUGS OR CLOTHING

KEEP CONTAINER TIGHTLY CLOSED WHEN NOT IN USE

TO MAINTAIN PRODUCT QUALITY, STORE IN THE DARK AT TEMPERATURES BELOW 40°C.
