Product Usage	
Kills	Hornets, Wasps, Yellow Jackets
Use On	Nests under eaves, screens, window frames, patios, cracks and crevices
Amount to Use	Spray until nest is thoroughly saturated

Read Entire Label

Do not use this product on living vegetation such as decorative trees, shrubs, ornamental plants or other desirable vegetation. Do not spray asphalt tile, shingles, rubber or plastic materials. Test on an inconspicuous area before using near any other type of surface.

Spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. [Remove protective cap.] Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill wasps, hornets and yellow jackets under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter, such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils.

Warranty and Disclaimer: This product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. Manufacturer is not responsible for the use of this product, contrary to the label instructions, under abnormal conditions or under conditions not reasonably foreseeable to the manufacturer and/or seller, and buyer assumes the risk of any such use.

{Note: The First Aid statements' grid format will be used if market label space permits; otherwise a paragraph format will be used.}
