PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes

ENVIRONMENTAL HAZARDS

Pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

COUSTIC-GLO CLEANER SANITIZER C₁ DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label.

This product is intended for commercial and industrial use by service persons engaged in cleaning of ceilings in homes, schools, hospitals, and public buildings. Its purpose is two-fold: to serve as a cleaning and bleaching agent of soiled surfaces, and to sanitize the

cleaned surfaces. If surfaces are heavily soiled they should be washed with a suitable detergent and rinsed before applying Coustic-Glo Ceiling Cleaner-Sanitizer C₁.

This is our C cleaning sanitizing system, which consists of two parts. C₁ is a solution containing sodium hypochlorite as a sanitizing agent and C₂ is an aqueous mixture containing a compatible detergent and a fragrance, which when mixed with the sanitizing agent enhances the cleaning properties of our C system.

To cover a regular size ceiling approximately 120 to 144 square feet, the spray solution is prepared just before use by adding 16 fluid ounces of C₂ to one gallon (128 fluid ounces) of C₁. The solution is mixed well and used within 15 minutes. The solution is sprayed onto the treated surfaces with a mechanical sprayer and allowed to slowly evaporate until the surfaces are dry. The used solution is good for up to two hours. Unused solution after that time should be discarded and a fresh solution prepared to complete the treatment as necessary, depending on square feet of surface to be treated. Do not allow occupancy of the treated spaces until surfaces are dry and the areas thoroughly ventilated. Remove pets or aquaria before spraying. Remove all food or perishable food items that may come in contact with spray solution before spraying areas. Do not allow spray solution to come in contact with food or feed items.

STORAGE AND DISPOSAL

Do not leave unused product at the site of application or in areas accessible to children. Rinse spray equipment thoroughly with water and spray onto several layers of newspaper. Discard the newspaper in regular trash collection. The original containers must remain with the service persons until empty. When empty, they should be rinsed with water and rinsings discarded in regular sewer. Rinsed containers may be returned to manufacturer for reconditioning and reuse or discarded at a suitable site for pesticide disposal.

This product has a maximum shelf life of 3 months for use as a sanitizer.
