DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

SHELL-GUARD™ is a water soluble inorganic borate salt containing compound with insecticidal, termiticidal, and fungicidal properties.

PREPARATION OF TREATMENT SOLUTION

A 10% aqueous solution is used for treatment. To prepare solution stir an equal amount by volume of SHELL-GUARD™ into warm clean water. Stir or agitate while adding until SHELL-GUARD™ is completely dissolved in the water. Use the mixture within 24 hours as settling of concentrate may occur. Mix in separate container. do not mix in spray applicator.

REMEDIAL AND PREVENTATIVE TREATMENT

For remedial and preventative control of organisms attacking wood, apply the 10% solution of SHELL-GUARD™ by brush or spray until surface is thoroughly wet (1 gallon per 150 square feet). For timbers 2 inches thick or greater Apply a second application within 4 to 24 hours. Thoroughly seal cut ends. Application may also be made by drilling and then injecting the solution under pressure into sound wood or until run-off is observed from entry/exit holes of infested wood. Treatment methods as described yields an approximate retention level of .24 pounds per cubic foot boric acid equivalent (BAE) in the outer 3/4" of the wood. To minimize borate leaching apply a water resistant sealer such as LIFELINE EXterior AFTER THE SURFACE IS DRY TO THE TOUCH - in low temperature and high humidity locations this may take 1-4 weeks.

SURFACE PREPARATION: Wood must be clean and bare: free of dirt, wax, and surface finishes. Remove all previous coatings or sealants. Remove surface mold or mildew prior to applying SHELL-GUARD™. Do not apply to frozen wood. Surface temperature must be between 40 F and 90 F.

CLEANUP: Cleanup tools and equipment with water. Rinse well and allow to dry.
