Super IQ Insecticide Coating LC

White, Semi-Gloss Finish

is a ready to use, residual insecticide designed for use as a spot treatment on interior and exterior surfaces of residential, industrial, commercial and institutional buildings and structures.

Controls Crawling Insects:

Ants, Cockroaches, Spiders and Clover Mites.

Controls Flying Insects:

Flies, Wasps, Mosquitoes, Moths and Gnats

Active Ingredient:

Chlorpyrifos [0-0 diethyl 0-(3,5,6-trichloro-2-pyridyl)phosphorothioate]..... 0.90%

Inert Ingredients:

Inerts..... 99.10%

Total 100.00%

EPA Reg. No. 59902-2

ACCEPTED

FEB 16 2000

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
Registered under
EPA Reg. No. 59902-2

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS & HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Do not allow children or pets to contact surfaces until coating has dried. May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing vapors while coating is wet. Avoid contact with skin, eyes and clothing. Do not apply to surfaces on which food will be prepared or served or in which animal feed will be served such as mangers or troughs. **NOTE TO PHYSICIANS:** Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine by injection is antidote of choice.

STATEMENTS OF PRACTICAL TREATMENT

If swallowed: drink plenty of water. Call a physician or poison control center. If inhaled: As with any fresh painted surface, get plenty of fresh air. If in eyes: Flush with plenty of water. If irritation persists, get medical advice. If on skin: Wash with plenty of water and soap.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds, fish and aquatic invertebrates. Birds feeding in treated areas may be killed. Clean up spilled product to reduce exposure to wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Apply this product only as recommended on this label.

DIRECTION FOR USE

It is a violation of FEDERAL law to use this product in a manner inconsistent with its labeling.

This product is to be used as a spot treatment on interior and exterior surfaces on buildings and structures. It should not be used as a broadcast treatment. It should be applied to locations where insects may inhabit, or use as routes of entry to building or structure. It should be used as supplied and not as an additive to other materials. Stir or shake well before application. Apply only to clean and dry surfaces. Provide adequate ventilation of areas during application and while coating is drying. Product may be applied by brush, roller or other suitable applicator tools or by coarse, low-pressure spray. It dries quickly to form a durable film. Treat a small area to view dried film appearance and test adhesion prior to complete application. Dried product may be washed with water or water and mild non-alkaline detergents. Each gallon covers approximately 340 to 530 square feet (34 to 53m²) of surface, or 650 to 1,400 linear feet (200 to 420m) of 6 to 4 inch wide bands. For best results, use without dilution and apply two coats. If necessary, dilute with up to 5% water.

GENERAL PEST CONTROL INDOORS:

(USE IN NON-FOOD AREAS): This product may be applied within residential buildings including homes and apartment buildings; non-food areas of buildings including homes and apartment buildings; and non-food areas of industrial, institutional and commercial buildings including, but not limited to, offices, hotels/motels, theaters, arenas, hospitals, factories, schools, restaurants, and dairy barns, chicken houses, tack rooms, equipment buildings and similar areas where animals may not come in contact with treated surfaces. Treatment areas are limited to cracks and crevices, wall voids, window and door casings, baseboards, plumbing penetrations and vent openings, floor drains and undersides of shelves and drawers. When applied in areas open to accessible by the public, take precautions to prevent contact with treated surfaces until product has dried.

USE IN FOOD AREAS

(For control of ants and cockroaches): When using this product in establishments where food is stored, processed, prepared, or served such as, but not limited to, groceries, food stores, bakeries, bars, restaurants, cafeterias, grain mills, trucks, truck-trailers, and canneries, apply this product only as a spot treatment and/or crack and crevice treatment. Do not apply on surfaces where food may come in contact or where food may be prepared or processed. Broadcast spraying of this product is prohibited.

EXTERIOR SURFACES

Apply to exterior walls and other surfaces for the control of crawling and flying insects, include window and door casings and other cracks or gaps in building walls or foundations to prevent ants, cockroaches, spiders, wasps, moths and flies from entering structures through such openings. A continuous band applied to the base of buildings is an effective barrier to crawling insects. Apply to the underside of eaves, roof overhangs, awnings of rigid construction and other wasp and spider nesting areas. Apply to outdoor refuse storage areas such as trash receptacles and garbage corrals to control flies and crawling insects attracted to these areas.

FOR CONTROL OF FIRE ANTS, spiders, wasps, and other insects nesting or harboring in electrical equipment including, but not limited to electrical transformer boxes, telephone switch gear housings, air conditioner cabinets, traffic signal and light standards, pump houses, around swimming pool equipment, underground equipment vaults, field radar and navigation equipment installations, apply this product to the interiors and exterior of the corners, joint access doors and panels, and sides of equipment housing. Application to the interior of such equipment must be made when equipment is not in operation and surfaces must be dry before placing equipment back in service. Do not apply to electrical connectors or components. Product may be applied by coarse, low-pressure spray or suitable brush. Shop performance applications (before equipment is installed) may be made via coarse spray using conventional airless spray equipment. Persons applying product by high-pressure spray must wear chemical resistant gloves, a respirator approved by NIOSH for organic chemical vapors, goggles and long sleeved clothing.

TREATMENT OF MANHOLES

(For control of cockroaches): Apply product on underside of manholes lids and manhole walls. Product may be applied via coarse spray using conventional airless spray equipment or by coating with a suitable brush. Persons applying product in manholes must wear chemical resistant gloves, a respirator approved by NIOSH for organic chemical vapors, goggles and long sleeved clothing. Apply no more than 48 ounces (3 pints) of product to each manhole. Do not discharge or spray unused material directly into sewer system. Do not apply product within 36 hours of predicted heavy rainfall.

STORAGE AND DISPOSAL:

Keep container tightly closed and store in a cool, dark place, preferably in a locked storage area. Do not contaminate water, food, or feed by storage or disposal. Product Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
