e. Based upon the data submitted, revise the statement: "Flammable. Keep away from heat, sparks, and open flame" to read:

Do not use or store near heat or open flame.

- f. Revise the statement: "Wear a MSHA/NIOSH certified..." to read:
- " While spraying and/or sanding boat surfaces, wear a MSHA/NIOSH certified..."
- g. Revise the statement: "Warning! This product contains a chemical known to the state..." to read:

Note. This product contains a chemical known to the state..."

- h. Revise the Active ingredient percentage to read: 60.7% instead of 61.2%.
- i. Revise the Inert ingredient percentage to read: 39.3% instead of 39.8%.
- j. Revise "Copper as metallic...53.4%" to read:

"Copper as metallic...53.9%"

k. Clearly indicate that the Underwater Metal Parts are for boats and vessels only.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

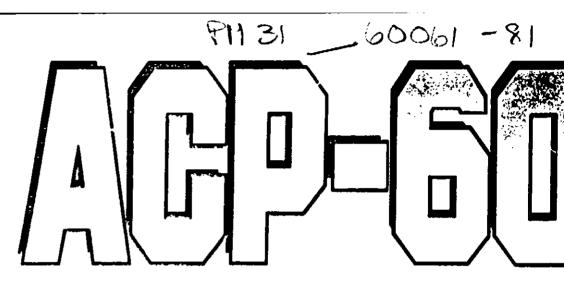

Sincerely,

John H. Lee Product Manager (31)

GENERAL DESCRIPTION: Feth! ACP-00 Ablaive Copper Polymer is an antifoling protective coating resistant in algae, barnactes, and other marine fooling. The high loading of courses unide present in the formula enables the paint to perform well, even in the most severe fooling areas. Its controlled erosion characteristics minimize casting buildup and keep underwater surfaces smooth and clean.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a monner inconsistant with its taboling.

PREPARATION OF SURFACE: The surface to be painted should be cloon, dry, and free of any contamination or foreign matter. Always prepare the surface to be painted by sanding and solvent cleaning before any paints or primers are applied. When sanding old antifouling paint use a dust mask to prevent the inhalation of sanding dust. Old, soft bottom paints must be completely removed before applying ALP-60.

COVERAGE, APPLICATION AND TEMPERATURE: ACP-60 cas to applied by brush, roller or spray. All painting should be done between 9:00 A.M. and 4:00 P.M. in order to avoid the possibility of dew or condensation spailing the application. The temperature range of application should be between 50 and 90 degrees. At least two, and preferably three or four coats should be applied for best performance, particularly in high wear areas such as the waterline. ACP-60 will cover approximately 400 square feet per gallon.

PREPARATION OF PAINT: ACP-60 is heavily loaded with cuprous exide. As a result of this loading there is a fendency for settling to occur especially if the paint has been on the shelf for several menths. It is necessary to thoroughly mix the paint before using. If possible shake the can of paint on a mechanical paint shaker. Before using check the sides and bottom of the can to make sure all the pigment has been mixed in. If mixing is going to be done with a wooden paddle or an electric drill mixer, pour off half of the liquid from the top of the can into another can and then properly mix in any settled pigment; then remix the two parts logether thoroughly.

THINNING: Use Petiti A(P-60 Thinner for thinning ACP-60 if needed, particularly on warm or breezy days. ACP-60 libraner can also be used to thin ACP-60 for spraying and for cleaning equipment. But not thin ACP-60 more than 10% (12 ounces per gallon) or inadequate paint film thickness will occur and premature erosion of the finish will be likely.

DRY TIMES: The minimum recoal time is six hours. The minimum dry time between the final coat and faunching is 16 hours. Under adverse drying conditions such as those encountered on cool or damp days, extend the dry himes by 50% in order to ensure that all the solvent is out of the paint film. There is no maximum time before faunching.

MAINTENANCE OF ANTIFOULING PAINT: No antifouring paint can be effective under all conditions are exposure. Man-made pollution and natural occurrences can adversely affect antifouring paint performance. Extreme hot and cold water temperatures, silt, dirt, oil, brackish water and even electrolysis can ruin an antifouring paint. Therefore, we strongly suggest that the buttom of the boat he checked several time: a month to make sure it is clean and that no growth is occurring. Lightly scrub the buttom with a self brush to remove anything from the antifouring paint surface. Scrubbing is particularly important with boats that are idle for extended periods of time. The self cleaning nature of the coating is most effective when the boat is used periodically.

#### PAINT SYSTEMS

FIBERGLASS: Wash the fiberglass with Pettit 15095 Dewaxer to romove parting agents, grease and dirt. Sand thoroughly with 80 grit sandpaper to a dult, fresty finish. Rewash the sanded surface with 15095 Dewaxer and then apply at least two coats of ACP-60. To skip the tedium of sanding, wash the fiberglass TWICE with 15095 Dewaxer and apply a thin coat of Pettil 6999 Sandless Primer. Let dry 1-2 hours and apply the ACP-60. Please note that accione does not readily clean contaminated surfaces and its use as a cleaner/dewaxer is not accommended. In paint old, hard antifouling paints, sand thoroughty with 80 grit sandpaper before applying ACP-60.

BLISTERED GELCOAT: Consult Technical Bulletins for detailed instructions before undertaking a blister repair

WOODEN HULLS: Old, hard antifouring paint should be thoroughly sanded. It priming is necessary on bare wood spots, apply a fouch up coat of ACP-60 to these areas. Then apply the subsequent coats of ACP-60 antifouring paint, STEEL HULLS: To remove loose rust and scale from the metal surface, scrape, sandblast, or wire brush. Salvent clean the surface to remove grease and dirt and apply 2-3 coats of Petiti 6980 Rustlot primer. Follow with ACP-60 antifouring paint Consult the directions for the 6980 Rustlot primer for detailed application and recoat instructions.

UNDERIWATER METAL PARTS: Abrade to clean bright metal by scraping, sandblashing, or wire brushing Servent clean and apply one thin coal Petht 6455/044 Metal Primer. Let dry four hours and apply one coal Petht 6462 C.— Zinc Chromate Primer. Let dry four hours and apply ACP-60 or let dry overnight, sand lightly, and apply ACP-60. Consult individual product labels for complete, detailed instructions.

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapors, spray mist or sanding dust. Wear a MSHA/NIOSH certified mask or respirator. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

### STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

IN EYES: Flush with plenty of water and get medical attention.

ON SKIN: Wash with plenty of soap and water.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

ENVIRONMENTAL HAZARDS: Material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes or allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill.

PHYSICAL OR CHEMICAL HAZARDS: FLAMMABLE! Keep away from heat, sparks, and open flame. Use only with adequate ventilation during mixing, application and drying. Use absorbent clean-up material if spilled. For fires blanket flames with foam, CO<sub>2</sub> or dry chemical. Wear MSHA/NIOSH certified breathing equipment.

STORAGE & DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Pesticide, spray mixture, or rinsate that cannot be used or chemically reprocessed should be disposed of according to procedures approved by Federal. State, or local disposal authorities.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and dispose of in an approved landfill. Consult Federal, State, or local disposal authorities for approved alternative procedures.

WARNING! THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER.
