Product Number: 60061-88
Product Name: Sapstain Control Concentrate SSC-3359

Formula amendment to improve solution stability upon dilution of concentrate with water
Notification of Alternate Brand Name: SC-2 Concentrate

~~Notification of Alternate Formulation and Alternate Brand Name per PR Notice 95-2~~

This notification is consistent with the provisions of PR Notice 95-2 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 95-2 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

FOR INDUSTRIAL USE ONLY

DIRECTIONS FOR USE (After Dilution)

Apply this product only as specified on this label. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Wood treated with this product is intended only for exterior use.

DESCRIPTION: SSCC-3359 is a liquid concentrate containing an effective fungicide for the control of sap stain and surface staining fungi that cause discoloration and staining of freshly sawn lumber. SSCC-3359 is an aqueous solution which may be applied to dimensional lumber, plywood and particle board to prevent surface mold growth.

DILUTION RATIO: SSCC-3359 is a concentrate dilutable with water. For lumber 2" or less in thickness, use 1 gallon of Concentrate per 150 gallons of water to protect against sap staining organisms during protected storage periods. For lumber thicker than 2" or where temperature and humidity conditions promote severe sap stain, use 1 gallon of concentrate per 100 gallons of water, or 1 gallon per 75 gallons of water.

APPLICATION: Flood spray or dip the freshly sawn clean lumber to be treated in SSCC-3359 solution within 24 hours after cutting. A dip of 15 seconds or more is sufficient. If not treated within 24 hours, stain may occur.

Lumber should be totally immersed or sprayed to insure treatment. Tanks should be covered by a roof to prevent the addition of rain water and consequent dilution of the solution. Vats and spray equipment should be cleaned regularly to remove sawdust and other debris. Freshly treated lumber should not be exposed to water. Store in protected area from rain and stack properly for best results.

CLEAN UP: Use water to clean immersion tanks, spray equipment and surrounding area. Soapy water may be required to remove Sap Stain SSCC-3359 from floors and equipment.

KOP-COAT
