60066-1
Pg. 10/4

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/obtain all data or other material required for registration/reregistration of your product under FIFRA section 3(c)(5) or FIFRA section 4 when the Agency requires all registrants of similar products to submit such data.

2. Submit the following product chemistry data on the active ingredient, sodium lauryl sulfate (SLS).

a. Series 61-1 Product Identity and Disclosure of Ingredients

Material Safety Data Sheets are required on all starting materials of SLS.

b. Series 61-2 Description of Beginning Materials and Manufacturing Process

1. Chemical formulations and material balance are required.

9/15/80

temperature, pressure, and reaction times are required.

c. Series 61-3 - Discussion of Formation of Impurities

The Agency needs the upper limits of each impurity formed during the preparation of SLS.

d. Series 62-2 - Certification of Limits

The upper limits of all impurities in the technical must be submitted.

e. Series 63 - Physical and Chemical Characteristics

All applicable physical and chemical characteristics of the technical SLS are required. If any of the data are not applicable then the corresponding footnote in 40 CFR 158.190 should be explained as to why particular data are not required.

3. Submit the following product chemistry data on the formulated end-use product, Dr. Dogkatz's Critter Chaser.

a. The formulation process.

b. Provide the chemical identity of all components, the percentage composition, CAS Registry Number, and Material Safety Data Sheets (two copies) for the following compounds:

1. Collagen Protein
2. Mazamide CS148
3. Carsonol SLS
4. PEG-75
5. Solangel 401

The supplier may contact EPA directly referencing your EPA Registration Number in their response. The confidential information submitted by the suppliers is kept confidential under FIFRA section 10.

c. Submit a revised Confidential Statement of Formula in which you list SLS as an insecticide in column 15 and the upper limit for formaldehyde.

d. All physical and chemical data on the end-use product are required. Although the color, physical state, viscosity, pH and specific gravity were provided; other required physical and chemical characteristics must still be submitted.

4. Submit a dermal irritation study on the end-use product per Dr. Seabaugh's 12/18/89 review.

5. A dermal sensitization study is required unless the 7/9/90 Bio-Technics Laboratories, Inc. response upgrades the study to core status. The Agency will inform you in writing whether the response upgrades the study.

6. Make the following changes to the product's label before you release the product into commerce.

a. Place a space between the pounds per gallon statement and the Keep Out of Reach of Children (KORC) statement.

b. Place the signal word "Warning" under the KORC statement.

c. Both the "Warning" signal word and the KORC statement must be 6 point type size.

d. Add "60066-1" after "EPA Registration Number:"

e. Add the EPA Establishment Number.

f. Delete "... and gloves are not needed when applied."

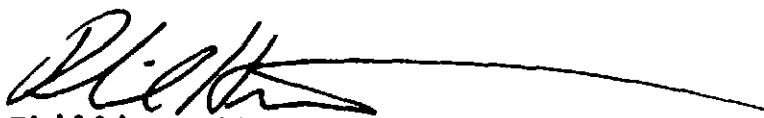

g. Replace "animal (dog, cat, etc.)" with "dog or cat."

h. Replace "10 minutes" with "5 minutes."

i. Move the "It is a violation of Federal law to use this product in a manner inconsistent with its labeling." statement directly below the Directions for Use heading.

A stamped copy of the label is enclosed for your records. Submit five (5) final printed labels before you release your product into commerce.

Sincerely,

Phillip Hutton
Product Manager (17)
Insecticide Rodenticide Branch
Registration Division (H7505C)

Dr. Dogkatz's Critter Chaser Shampoo
 Precautionary Statements

Hazards to Humans and Domestic Animals
 Warning Causes eye irritation. Do not get in eyes. In case of
 eye contact, flush thoroughly with water. If irritation persists,
 get medical attention.

Dr. Dogkatz's Critter Chaser Shampoo has been laboratory tested
 and has proven to be an extremely effective killer of fleas. It
 has no medicinal odor, and gloves are not needed when applied.

Directions for Use

Shampoo your animal (dog, cat, etc.) regularly, especially during
 the flea/tick season. Thoroughly wet the entire haircoat with
 water and apply enough shampoo to make a lather. Work the lather
 thoroughly into the haircoat. Start shampooing process from the
 neck down. Let stand 10 minutes. Rinse off thoroughly.

It is a violation of federal law to use this product in a manner
 inconsistent with its labeling.

Storage and Disposal

Do not reuse container. Rinse thoroughly before discarding in
 trash. Store in original container.
