Attention: Judith A. Thompson

Subject: Gold Crest Promar Tracking Powder
EPA Registration Number 61282-8
Your label amendment dated January 24, 1995

Dear Ms. Thompson,

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, and pursuant to PR Notice 94-7, is acceptable provided that you:

- 1. Change "food or on surfaces" to "food or surfaces" (i.e., delete "on") in the next-to-last sentence of the "USE RESTRICTIONS".
2. Insert the text

"DIRECTIONS FOR USE (continued from left panel)"

at the top of the right panel, to introduce the paragraph which begins with "Maintain powder in treated areas". If, when labels are printed, it is necessary to continue the use directions on the right panel, the continuation clearly would not be needed.

- 3. Submit one copy of your final printed labeling before you release the product for shipment.

We also caution you that when you print labels, you must preserve the arrangement of headings and subheadings that appears on your draft proposed revised label.

If the conditions of registration that are specified above are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

1995

A copy of the label stamped "Accepted with Comments" is enclosed for your records. If you have any questions about this letter, please contact John Bazuin at (703)305-6600.

Sincerely yours,

Robert A. Forrest  
Product Manager (14)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS:** Use against the Norway rat, Roof rat and House mouse inside of homes, industrial and agricultural buildings and similar man-made structures. This product may also be dusted into rat burrows that are located along the periphery of buildings and that are likely to serve as routes of entry into these structures. Tracking powder must be placed in locations not accessible to children, pets, domestic animals, or wildlife. Do not place powder in areas where there is a possibility of contaminating food or on surfaces that come in direct contact with food. Do not place near ventilation duct openings.

**SELECTION OF TREATMENT AREAS:** Determine dry areas where rats and mice will most likely pick up the powder on their feet or fur and ingest it during grooming. Generally, these areas are along walls, by gnawed openings and burrows, in corners and concealed places, in spaces between floors and walls or in locations where rodents or their signs have been observed. Remove goods piled directly on floor and place on skids. Use boxes or other obstacles to force rodents to travel through constricted areas. Give special attention to the climbing ability of roof rats. For this species use suitable cardboard tubes or wooden tunnels securely attached to rafters or other horizontal surfaces where rats will pass. Employ tubes long enough to prevent spillage of powder through the ends.

**APPLICATION DIRECTIONS:** Evenly sprinkle ½ ounce (3 level teaspoons) of this product in patches 12 inches long and 6 inches wide. Apply the powder into the rodent burrow or holes or within walls with a hand bulb or similar duster. Do not use power dusting devices. Sprinkle the powder in patches in such a manner as to expose the rodent to it. Patch size may be (but not limited to) 6" x 12" and should be adapted to each situation. For rat burrows that are located along the periphery of buildings and that are likely to serve as routes of entry into these structures, place about 5 grams of tracking powder in each burrow with footpump duster (about 15 pumps). Close burrows with soil, loose leaves, or paper. Repeat if burrows are reopened.

RIGHT PANEL

Maintain powder in treated areas for at least 20 days. Where accessible, collect and dispose of all dead animals and used powder promptly. Repeat treatment when infestation recurs. Where a continuous source of infestation is present, establish permanent tracking powder stations and replenish the powder as needed.

RIGHT PANEL (continued)

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

Harmful if swallowed, inhaled, or absorbed through the skin. Wear dust mask or respirator if product may be inhaled. This product can be absorbed through the skin, so it should be handled with gloves. Do not allow tracking powder to contact skin. Causes eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Keep away from humans, domestic animals or pets. This material may reduce the clotting ability of blood and cause bleeding. Exposure during pregnancy should be avoided. Do not contaminate feed or foodstuffs.

**STATEMENT OF PRACTICAL TREATMENT**

**IF SWALLOWED:** Call a physician or a Poison Control Center immediately.

**IF IN EYES:** Flush with plenty of water for 15 minutes. Contact physician if irritation persists.

**NOTE TO PHYSICIAN:** If ingested, administer Vitamin K, intramuscularly or orally as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.

**ENVIRONMENTAL HAZARDS**

This product is toxic to wildlife. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**DISPOSAL:** Store only in original container, in a dry area inaccessible to children and pets.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Completely empty pail into application equipment. Then dispose of empty pail in a sanitary landfill, or by incineration, or, if allowed by State or local authorities, by burning. If burned, stay out of smoke.
