It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Apply as a soil treatment. Terrestrial, locJ and non-food crops may be broadcast by air or ground equipment unless specified otherwise on the label. Apply 24 to 40 pounds of pelleted bait per acre unless otherwise stated. Use a band treatment between the rows after formation of edible parts. Do not contaminate edible portions of the plant.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. **NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for Agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. The area being treated must be vacated and not re-entered by persons without shoes.

**USE PRECAUTIONS**

Read entire label before using. Use only as a baiting treatment to be applied directly to the soil area beneath plants as listed on this label. Do not allow bait to come in contact with parts of plant that may be used for food or feed purposes. The grower is responsible for residues on his crops, as well as for damages caused by drift from his property to that of others. Do not allow to drift to areas occupied by beneficial animals or onto adjoining food, fiber or pasture crops. NOTE: Snail & Slug AG Pelleted bait should never be applied to dry soil. Applications should be made following an irrigation for best results. Apply anytime of the day, but evening applications are preferred. Do not re-water for 48 hours after application.
