Subject **PROMAR BLOX® ALL-WEATHER RODENTICIDE**
EPA Reg. No. 61282-12
Your amended application of March 10, 2003
Revised Label

Purpose The purpose of your submission under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is to revise your label according to PR Notices 2001-1 and 2001-6.

Label The label submitted with the above letter, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable, provided that you make the following changes and submit one (1) copy of final printed labeling, including graphics, to us before you release product for shipment. A copy of the stamped label is enclosed for your records.

1. Add the following text as a final paragraph to your "USE RESTRICTIONS":

Wear protective gloves when applying bait. With detergent and hot water, wash all implements used for applying bait. Do not use these implements for mixing, holding, or transferring foods or feeds.

Label-continued

- 2. The following sites make this product a "Restricted Use Pesticide": river banks, gullies, irrigation ditches, garbage dumps, and landfills. During the re-registration process, you will have to add the "Restricted" text or delete these sites from this label.
- 3. In your "APPLICATION DIRECTIONS" under "Rats:", add an asterisk (*) after "bait per placement.", and include the following additional text:

*For the 12 oz. package, the following statement will be added: "The amount of bait in this package is unlikely to be sufficient to kill more than three to twelve rats."

Existing stocks

Stocks of existing labels may be used for eighteen (18) months.

Consequence for non-compliance

If these conditions are not complied with, the registrations will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Keep away from humans, domestic animals and pets. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding.

ENVIRONMENTAL HAZARDS

This product is toxic to mammals and birds.. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Store only in original closed container in a cool, dry place inaccessible to children and pets. Store separately from fertilizer and away from products with strong odors which may contaminate the bait and reduce acceptability. Sweep up spillage carefully and collect for disposal.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL: Commercial Use: Dispose of empty container in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
Household Use Disposal - If empty: Do not reuse empty container. Place in trash or offer for recycling if available.
If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions.
IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help to prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.
USE RESTRICTIONS: For control of Norway rats, roof rats and house mice in and around homes, industrial and agricultural buildings, and similar man-made structures. This product is especially suited for use in wet or damp areas, including river banks, gullies, irrigation ditches, sewers, garbage dumps, and landfills.
Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not apply bait directly to ground surface or in grass or other ground cover.
SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.
APPLICATION DIRECTIONS: Each Promar Blox consists of a 4 oz. Block scored so that it can be broken into four 1 oz. Pieces.
RATS: Apply 1 - 4 Promar Blox (usually at intervals of 15 to 30 feet) per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.
MICE: Break Promar Blox and place one 1-oz. piece at each placement location. Space placements at 8- to 12-foot intervals. Two 1-ounce pieces may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.
RATS AND MICE: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.
