DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats, and house mice in and around homes, industrial and agricultural buildings, and similar man-made structures. This product may also be used in sewers.

This product is especially suited for use in wet or damp areas. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: Rodex Blox-1 come in 12-oz. and 16-oz. sizes. 12-oz. Rodex Blox-1 are scored so that they can be broken into three 4-oz. pieces with a hole at the center of each. Each 4-oz. piece is also scored so that it can be broken easily into four 1-oz. pieces. 16-oz. Rodex Blox-1 are scored in two rows of 8 mounds each. Each mound weighs approximately 1 oz.

RATS: Apply 4 to 16 oz. of this product per placement. Apply bait as entire Rodex Blox-1 or as pieces of blocks broken so as to provide the amount of bait needed. Maintain an uninterrupted supply of fresh bait for at least 10 days.

MICE: Break Rodex Blox-1 into discrete 1-oz. pieces. Apply one 1-oz. piece per placement. Space placements at 8- to 12-foot intervals. Placement of two 1-oz. pieces each may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

RATS/MICE: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

Do not contaminate water, food or feed by storage or disposal.
