Chlorsan Detergent Sanitizer can be used in dairies, hospitals, breweries, food processing plants and restaurants. It is particularly effective on surfaces which contact food. It is recommended for use on hard (non-porous) surfaces or on dishes, glasses, food processing equipment or utensils including dairy and brewery equipment or utensils that need a strong sanitizer treatment with little or no cleaning action. This material is very effective on table tops, tanks, vats, floors, walls, dishes, glasses, metallic utensils and equipment.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Clean object to be sanitized with a suitable hard surface cleaner and rinse well with potable water. It may be necessary to remove gross filth and heavy soil from surface by pre-scrape, pre-flush and where necessary, a pre-soak treatment.

Dissolve 1 oz. of Chlorsan Detergent Sanitizer per 2.5 gallons of water to give a solution containing 100 ppm available chlorine. Apply the sanitizing solution to the surface thoroughly. Let stand at least one minute. Drain and air dry. The same solution may be used in the feed tanks of immersion or spray type machines providing at least one minute contact time to sanitize dishes, glasses, food processing equipment and utensils.

The sanitizing solution should be used promptly after mixing. It should be prepared daily or more often if it becomes dilute or soiled. If the solution is allowed to stand and/or continued use shows the level of chlorine has not been maintained, add more Chlorsan Detergent Sanitizer to maintain a use solution of 100 ppm available chlorine.

For mechanical operations, the prepared and spent use solution may not be reused for sanitizing but may be used for other purposes such as cleaning.
