## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Theresa Ryan Mann Lake Ltd. 501 S. 1<sup>#</sup> Street Hackensack, MN 56452-2001

DEC 8 2004

Dear Ms. Ryan:

٢.

ľ

Subject: Labeling Amendment; First Aid Para-Moth EPA Registration No. 61671-2 Submission Date: November 2, 2004

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following provisions:

- 1) Delete the statement "STATEMENT OF PRACTICAL TREATMENT".
- 2) Beneath the statement, "FIRST AID", insert the signal word "WARNING".
- 3) Revise the statement, "If breathing is difficult give oxygen", within the "If inhaled" portion of the FIRST AID section of the label to read, "Call a poison control center or doctor for treatment advice".
- 4) Revise the statements within the "If on skin or clothing" portion of the FIRST AID section of the label to read:
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15 20 minutes.
  - Call a poison control center or doctor for treatment advice.
- 5) Revise the statement, "NEVER GIVE ANYTHING TO AN UNCONSCIOUS PERSON", within the "If swallowed" portion of the FIRST AID section of the label to read, "Do not give anything by mouth to an unconscious person."

A stamped copy is enclosed for your records. Please submit one (1) final printed copy for the referenced label, incorporating the above changes, before releasing the product for shipment. If you have any questions regarding this letter, please contact Kable Bo Davis at (703) 306-0415.

Sincerely yours,

Daniel C. Kenny Product Manager (01) Insecticide-Rodenticide Branch Registration Division (7505C)

Dichlorbenzene.para.Solid. Un3077.RQ (Dichlorobenzene)

1

Active Ingredient: Para-Dichlorbenzene 100% CAS: 106-46-7 Chemical Name: 1.4 - Dichlorobenzene

### PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND DOMESTIC ANIMALS

- DO NOT GET IN EYES OR ON SKIN. Wear full protective gear including googles/face shelld. Viton/Nitrite gloves and boots.
- WASH THOROUGHLY AFTER HANDLING.
- USE WITH ADEQUATE VENTILATION: Ventillation must be sufficient to keep air concentration levels below OSHA permissible exposure limits.(75 ppm - 8 Hour TWA)
- DO NOT BREATHE VAPOR OR DUST.
- KEEP AWAY FROM HEAT AND FLAMES. Combustible solid. Flash point 150° F (66° C) TCC.

## **ENVIRONMENTAL HAZARD**

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewerage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

## PHYSICAL OR CHEMICAL HAZARD

Vapor concentration of Para-Dichlorobenzene greater than 50 ppm have been reported to cause irritation to skin, eyes and through in humans. Repeated excessive exposure can cause liver and kidney damage.

## KEEP OUT OF THE REACH OF CHILDREN WARNING:

HARMFUL IF SWALLOWED OR INHALED COMBUSTIBLE

center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment.

NOTE TO PHYSICIAN Never administer adrenalin for overdose or over exposure. Increased sensitivity of the heart may occur.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistant with its labeling.

For the control of moths in beehives and bee housings. See side panel text under the heading WAX MOTH CONTROL DIRECTIONS for instructions in the use of this product.

DIRECTIONS FOR USE: To be used for empty extracted combs when in storage.

CAUTION: DO NOT USE FOR COMB HONEY, CUT COMB HONEY OR COMBS OF HONEY THAT HAVE NOT BEEN EXTRACTED.

ASK FOR AND REVIEW MATERIAL SAFETY DATA SHEET (MSDS) FOR DETAILED SAFETY, HEALTH EFFECTS, SPILL AND DISPOSAL INFORMATION

## STORAGE AND DISPOSAL

#### STORAGE:

- Keep away from heat and flames. Store in a cool place. Para-Dichlorobenzene melts at 53° C (127°F).
- IN CASE OF SPILL: Scrape and shovel into sealable containers for proper disposal. Wear all protective gear. CONTAINER DISPOSAL:

Completely empty bag into application equipment. Then dispose of empty bag in a permitted sanitary waste landfill if allowed by State and local authorities, or by approved incineration.

### PESTICIDE DISPOSAL:

- DO NOT CONTAMINATE WATER, FOOD, OR FEED.
- Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste rep resentative at the nearest EPA Regional Office for guidance.
- Discarded or spilled Para-Dichlorobenzene is a hazardous waste: RCRA Hazardous Waste No: U-072.
- EMPTY CONTAINER: Becomes hazardous waste and retains vapor and product residue. Observe all label and MSDS safeguards until container is disposed of according to federal, state and local regulations.

### WAX MOTH CONTROL DIRECTIONS

Treatment with Para-Dichlorobenzene requires no special storage facilities. The supers should be stacked as tightly as possible, and special precautions should be taken to see that the gas, which is heavier than air, cannot escape at the bottom of the stack. This can be accomplished by laying several layhers of newspaper down prior to stacking the supers. For long periods of storage, as over winter. the cracks between supers should be covered with stirps of tape. No more than 5 full-depth supers or 10 half-depth supers should be used in a stack.

Taller stacks may not allow for the complete diffusion of the heavy gas, especially during periods of low temperature. In each stack of supers, 3 oz. of crystals (6 tablespoons) should be placed on the top bars, preferably, seperated from the frames by a piece of paper or cardboard. The cover should then be put tightly in place. At intervals of 2 or 3 weeks the covers of the stacks should be raised and the top supers examined; if the crystals are no longer present, more should be added. Para-Dichlorobenzene kills adults and immature stages, but not eggs. The continous presence of crystals within the stack not only repels moths, but also kills any young larvae that hatch after the combs are placed in storage.

Stored combs that have been treated must be thoroughly aired first, otherwise bees will be killed.
