

PROPOSED SAMPLE LABEL

FOR-MITE

For the control of Tracheal Mites
and the Suppression of Varroa Mites in Honeybees

Active Ingredient:	BY WEIGHT
Formic acid	65.9%
INERT INGREDIENTS	34.1%
TOTAL	100.0%

Before using this product read the entire Precautionary Statements, Conditions of Sale and Warranty, Directions for Use and Storage and Disposal Instructions. If the Conditions of Sale and Warranty are not acceptable, return the product unopened within 30 days of purchase to the place of purchase.

ACCEPTED

JAN 28 1999

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 61671-3

**KEEP OUT OF REACH OF CHILDREN
DANGER**

STATEMENT OF PRACTICAL TREATMENT

- If swallowed: Call a physician or Poison Control Center immediately. If medical advice cannot be obtained, drink promptly a large quantity of milk, egg white, or gelatin mixture, or if these are not available, a large amount of water and take person and product container to the nearest emergency treatment facility. Avoid alcohol. **DO NOT INDUCE VOMITING.**
- If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth to mouth. Get medical attention.
- If on skin: Remove contaminated clothing immediately and wash affected areas with soap and large amounts of water. Get medical attention.
- If in eyes: Immediately hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL USE INFORMATION

FOR-MITE is a gel formulation of formic acid in a plastic pouch that controls tracheal mite and aids in the suppression of verroa mite. FOR-MITE is not recommended for suppression of the verroa mite in tropical climates or in areas where there is no broodless period for the honeybee.

Do not use when honey supers are in place to prevent contamination of marketable honey or wax by unwanted residues. Use when there is no surplus honey flow and daytime temperatures are expected to reach at least 50 degrees F, but not exceed 85 degrees F. Leave hive entrances fully open when treating.

For Two Story Colonies (bees covering 8 to 20 full-size Langstroth frames or equivalent)

- Use one FOR-MITE pouch
- Remove telescoping and inner covers from hive
- Remove entire Bottom adhesive strip on FOR-MITE pouch to expose vent holes
- Lie FOR-MITE pack on top bars of hive, slightly off center
- Remove Top adhesive strip on FOR-MITE pouch to expose vent holes
- Replace covers
- Leave in hive for 30 days

For One Story Colonies (bees covering 4 to 10 full-size Langstroth frames or equivalent)

Follow above directions but only remove HALF of bottom adhesive strip

Remove FOR-MITE pouch from hive at least 6 weeks prior to harvesting the honey to prevent contamination of marketable honey.

Note: Use of FOR-MITE will disturb colony activities and may result in slightly increased bee mortality or queen rejection, especially at temperatures above 90 degrees F. If colonies are treated during hot weather or during honey flow, the bees may be repelled from the bee hive and honey production reduced.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive to eyes and skin by direct contact or by exposure to vapors, causes potentially irreversible eye damage, causes skin burns. Do not get in eyes, on skin, or clothing. Wear goggles or faceshield or safety glasses, and chemical resistant gloves. Harmful or fatal if swallowed. Potential skin sensitizer. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Harmful if inhaled. Avoid breathing vapors. Use only with adequate ventilation.

USE DIRECTIONS - PERSONAL PROTECTION EQUIPMENT (PPE) APPLICATORS AND OTHER HANDLERS MUST WEAR:

- o Safety glasses or goggles or faceshield
- o Chemical-resistant gloves, such as barrier laminate or butyl rubber, or neoprene rubber, or polyvinyl chloride (PVC) or viton or nitrile rubber.
- o Long sleeved shirt and long pants

Follow manufacturers instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS
Users should: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Always stand upwind of use location to avoid strong vinegar odor.

PHYSICAL AND CHEMICAL HAZARDS

Combustible. Do not use or store near heat or open flame.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

STORAGE: Store packs in a cool, dry, well ventilated area away from heat, sparks and flame. Do not store in basements or other areas where fumes could accumulate. Freezing will not harm FOR-MITE, so it can be stored in unheated areas.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide is a violation of Federal Law. If pesticide cannot be used according to label directions and must be disposed, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Do not reuse empty pouch. Offer for recycling or dispose of in sanitary landfill, or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

CONDITIONS OF SALE AND WARRANTY

"Mann Lake makes no warranty or guarantee of any kind, expressed or implied, concerning effects of use of this product, other than those specified on this label. Buyer or user accepts all responsibility for results due to misuse or *improper handling of this product.*"
