SECTAGON-K54

EPA Reg. No. 61842-7

Metam Alliance's Request on Your Behalf to Amend Label

Dear Ms. Kominski:

In the Agency letter of May 4, 2010, the Agency approved amended labeling for this registration with the condition that specific label revisions be made to the May 4, 2010 label stamped "Accepted with Comments". This letter further amends the May 4, 2010 letter by revising the label comments and by requiring additional changes.

- 1. (Label p.3) (EPA Comment 3-b) (Alliance issue #17) Replace comment 3-b with this text:
 - In the "User Safety Requirements" section, add the following sentences: "DO NOT transport contaminated clothing inside a closed vehicle unless stored in a sealed container. Wash or dispose as specified."
- 2. (Label p.3) (EPA Comment 3-d) (Alliance issue # 3)
 Disregard EPA's comment to add additional California restrictions back on the label.
- 3. (Label p.3) (EPA Comment 3-e) (Alliance issue # 1) Replace comment 3-e with this text:

To the "Directions for Use" section, add the following text: "Do not apply when wind speed favors drift beyond the area intended for treatment. Do not use in a greenhouse or any other enclosed structure or confined area."

- 4. (Label p.3) (Alliance issue #53A)
 Under the "Personal Protective Equipment for Respiratory Protection" section, revise the second sub-bullet as shown:
 - "A respirator with a canister approved for pesticides (NIOSH approval number prefix TC-14G) or a canister with any N, R, P or HE prefilter."

- 5. (Label p.5) (EPA Comment 5-b) (Alliance issue #7) Replace comment 5-b with this text:
 - At the end of the "Protection for Handlers" section, add the following sentence: "Cartridges or canisters must be replaced when odor or irritation from this product becomes apparent, if the measured concentration of MITC is greater than 6000 ppb, or after 8 hours of use, whichever occurs first."
- 6. (Label multiples pages) (EPA Comment 8-f) (Alliance issue # 9) Disregard EPA comment number 8-f about air temperature.
- 7. (Label p.16) (EPA Comment 8-h) (Alliance issue # 8) Replace EPA's comment 8-h with this text:
 - In the wind speed section of the "Center Pivot" section, replace the first two bullets with the following:
 - For sprinkler or **center pivot** applications: 1) not using a solid stream type nozzle, OR 2) having a release height or spray height greater than 4 feet, OR 3) having 30 lbs or greater PSI at the sprinkler head, wind speed at the application site must be a minimum of 2 mph at the start of the application or forecasted to reach 5 mph during the application and the maximum wind speed is 10 mph.
 - For sprinkler or center pivot applications using 1) a solid stream, AND 2) having release height and spray height less than 4 feet, AND 3) having 29 lbs. or less PSI at the sprinkler head, wind speed at the application site must be a minimum of 2 mph at the start of the application or forecasted to reach 5 mph during the application and the maximum wind speed is 25 mph.
- 8. (Label p.16) (EPA Comment 8-i) (Alliance issue # 30)
 Disregard comment 8-i about the "Center Pivot Applications" section.
- 9. (Label p.18) (EPA Comment 8-1) (Alliance issue #31)
 Disregard EPA's comment 8-1 about the "Solid Set Sprinkler Applications" heading.
- 10. (Label pages 8-28) (Alliance issue # 12)
 In the "Soil Conditions" sections of Solid Set Sprinkler; Drench; and Drip, Flood Basin,
 Furrow and Border applications, the first bullet must be revised to the following:
 - "Soil must be in good tilth and free of large clods. Large clods can prevent effective soil sealing and reduce effectiveness of the application. If subsurface soil compaction layers (hardpans) are present within the intended fumigation treatment zone, tillage to fracture these layers must occur. The soil must be tilled prior to the application, at a minimum to the depth of the treatment zone."
- 11. (Label pages 8-28) (Alliance issue # 55)
 Under "Soil Moisture" for all GAP application methods add "(field capacity)" after the phrase "soil capacity" throughout the label.
- 12. (Label pages 8-28) (Alliance issue # 56)

Under "Soil Moisture" for all GAP application methods revise the following language:

- "The soil moisture in the top six inches of soil must be at <u>between</u> 60% to 80% soil capacity (field capacity) immediately prior to the application."
- 13. (Label pages 9, 12, 14) (Alliance issue # 54)
 Under the "Soil Temperatures" sections of the GAPs for Shank, Spray Blade, and Rotary
 Tiller Application methods, delete the phrase "point of injection" and replace it with
 "injection depth."
- 14. (Pages 19 and 37 of the Label) (Alliance issue # 33)

 Delete all cross references to the former "General Precautions for Irrigation Systems" section.
- 15. (Label p.25) (Alliance issue # 42)
 Add the following to the "Application and Equipment Considerations" section of the GAP for Drip Application method:
 - "Nozzles and metering devices are of correct size and are sealed and unobstructed."
- 16. (Label p.31) (EPA Comment 11-c) (Alliance issue # 14)
 The maximum application rate must be changed to read,
 - "Maximum Application Rate is 360 lbs ai/A. (62 gallons per treated acre)."
- 17. (Label p. 37) (Alliance issue # 26)
 Add the following sentences to the "Check Flood (Basin) Furrow and Border" section:
 "Meter SECTAGON-K54 at a steady rate into water during irrigation. Depending on the kind of pest and the treatment depth, use 30-62 gallons per treated acre in 3 to 18 inches of water per acre. Meter SECTAGON-K54 into the irrigation water at the head of the field at a point with enough turbulence to assure adequate mixing of the product in the water."
- 18. (Label p.46)

 Verify that the warranty and disclaimer language is up to date. See the link below for further information.

The label associated with these changes has been previously stamped "Accepted with Comments" and is dated May 4, 2010. Submit one copy of the final printed label that incorporates the required changes before the product is released for shipment. If you have any questions, please contact Cathryn O'Connell by phone at (703) 308-0136 or via email at oconnell.cathryn@epa.gov or Erik Kraft by phone at (703)308-9358 or via email at kraft.erik@epa.gov.

Sincerely,

Erik Kraft

Acting Product Manager (20)
