### DIRECTIONS FOR USE

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This supplemental label must be in the possession of the user at the time of application. Read the label affixed to the container for Configure before applying. Use of Configure according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Configure.**

### PRODUCT INFORMATION

CONFIGURE increases lateral branching and promotes flowering in certain ornamental crops. In addition, applications of CONFIGURE may reduce the overall height of the plant resulting in more compact and marketable plants.

Plant response to CONFIGURE can be strongly influenced by cultural and environmental variables. Growing media, water/fertilizer management, temperature, light, greenhouse composition, and other cultural practices may impact plant response. Plant size, container size and cultivar or variety can also influence treatment response. Although multiple cultivars have been tested for sensitivity to CONFIGURE and have demonstrated high levels of tolerance, it is impossible to insure an acceptable response in all cultivars. **First time users of CONFIGURE should first conduct trials on a limited number of plants to determine crop response.**

### GENERAL INFORMATION

**Do not apply this product through any type of irrigation system.**

**APPLICATION INSTRUCTIONS FOR USE ON CONTAINERIZED ANNUAL AND PERENNIAL FLOWERING AND FOLIAGE CROPS AND TROPICAL PLANTS**

Apply CONFIGURE to induce lateral or basal branching on containerized annual and perennial ornamental crops and tropical plants grown in commercial greenhouses and glasshouses.

- Apply CONFIGURE as a foliar spray when plants are fully established during active growth i.e. at least 3 to 4 weeks after potting.
- Apply CONFIGURE at rates ranging from 50 to 500 ppm.
- Apply in a uniform spray volume of 2 quarts per 100 square feet of area.
- First time users of CONFIGURE should treat a limited number of plants starting with 50 ppm on annuals and 100 ppm on perennials and tropical plants; observe for plant responses and make rate adjustments accordingly.
- Multiple applications of CONFIGURE at 7-10 day spray intervals may be necessary to achieve optimum results.
