Dricon Solution (4.5% BA)
Label Amendment dated February 27, 2013
EPA Registration 62190-37

Dear Ms. Square:

The Agency has reviewed your request for an amendment submitted in accordance with continuing registration under the Federal Insecticide Fungicide and Rodenticide Act (FIFRA), as amended, and determined the action acceptable.

In summary, our review of your Storage and Stability data, MRID 49065702, indicate a drop in the nominal concentration of the lower certified limit and confirms your request to amend the label. The statement "Use this product within 3 months of the date of manufacture" will be added to the use directions as requested. According to your description of this product's manufacture, Dricon Solution (4.5% BA) is generally made to order and blended directly into bulk tanker trucks and used soon afterwards. For these customers, the date of manufacture is on the bill of lading that accompanies the shipment. In addition, the data submitted for the Enforcement Analytical method and the Physical and Chemical properties, MRIDs 49065701 and 49065703, have been reviewed and are acceptable. A copy of our Chemistry review (DP412418) is enclosed.

A copy of your accepted revised label is enclosed. Please provide a finished copy of your updated finished label for our files. If you have any questions concerning this letter, please contact Tom Luminello by telephone, (703) 308-8075, or by e-mail at luminello.tom@epa.gov.

Sincerely,

for Tom Luminello

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use in pressure-treating forest products. Pressure treatment procedures must rigidly adhere to the current specifications of Arch Wood Protection and/or those of the American Wood Protection Association. This product may be applied with or without dilution into water. Treatment procedures must rigidly adhere to the current specifications of Arch Wood Protection and/or those of the American Wood Protection Association. This product may be applied with or without dilution into water. Apply this product within properly calibrated treatment cylinders to render final boric acid content ranging from 1.2 to 4.5 percent by weight of the treated wood. When applied in this manner, this product protects the wood against termites, other wood destroying insects, and decay fungi.

Use this product within three months after the date of manufacture.
