Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-255-3924 (Chemtel) for emergency medical treatment information.	

{Environmental Hazards statement applies only to product packaged in containers greater than or equal to 5 gallons}

**Environmental Hazards**

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

**Storage:** Store in original container in a dry, locked area inaccessible to children and pets. **Disposal:** Do not reuse empty container; wrap and put in trash.

*{For product packaged in 10 gram pouches:}*

*{For product packaged in finger pump containers of 1,000 grams each:}*

To inhibit the growth of mold and mildew in paint and wallpaper adhesives, add two (2) pumps (10 grams) Super Mildex to one (1) gallon paint or adhesive. Mix thoroughly and then use the paint or adhesive as directed. Contains enough Super Mildex to mix with 10 gallons of paint or adhesive.

For questions call 1-800-253-3957

{Note: The First Aid statements' grid format will be used if market label space permits; otherwise a paragraph format will be used.}

The figure consists of two columns of eight small diagrams each, representing a 4x4 grid. The diagrams show the evolution of a pattern of black dots over 16 time steps. The left column shows steps 0 through 7, and the right column shows steps 8 through 15. The pattern starts as a single dot at (1,1) and spreads outwards, forming a diamond shape by time step 15.
