Subject: ASHTA Gold  
EPA Reg. No. 62531-2  
Methyl Bromide Industry Panel's June 14, 2010 Request on your behalf to  
Amend Label

Dear Mr. Reese:

In the Agency letter of June 3, 2010, the Agency approved amended labeling for this registration with the condition that specific label revisions be made to the June 3, 2010 label stamped "Accepted with Comments". This letter adds an additional change to the June 3, 2010 label stamped "Accepted with Comments" and amends the June 3, 2010 letter as follows:

1. On pages 5 and 24 of the stamped accepted label, Spill and Leak Procedures, revise the sentence "Such material should be disposed of on site or at an approved disposal facility." to read "Such material must be disposed of on site or at an approved disposal facility."
2. Label revision number 12 in the amendment letter is revised so that the text on page 18 under Calibration, Set-up, Repair, and Maintenance for Application Rigs, fifth bullet, first sub-bullet, reads as follows:

"If a compressed gas cylinder is used, make sure that positive pressure is maintained in the compressed gas cylinder at not less than 200 psi during the entire time it is connected to the application rig. *(This is not required for a compressed air system that is part of the application rig because if the compressor system fails, the application rig will not be operable.)*"

The label associated with this change has been previously stamped "Accepted with Comments" and is dated June 3, 2010. Submit one copy of the final printed label that incorporates the required changes before the product is released for shipment. If you have any
