Dear Mr. DeTurck:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated March 4, 2010 for:

EPA Registration No. 62577-7 Echols Mouse and Rat Pellets

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change requested falls within the scope of PRN 2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on <u>nonrefillable</u> containers. If you have any questions, please contact me directly at 703-305-5967 or via e-mail, gaines.jennifer@epa.gov.

Sincerely,

Jennifer Gaines Wildlife Biologist Insecticide-Rodenticide Branch Registration Division (7505P) Office of Pesticide Programs

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL:** Read this entire label and follow all use directions and use precautions. **IMPORTANT:** Do not expose children, pets or other non-target animals to rodenticides.

To help prevent accidents:

1. Store product not in use in a location out of the reach of children and pets. 2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under 6 years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can

be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals prone to vandalism.3. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

Use Restrictions: For control of Norway rats, roof rats and house mice in and around homes, industrial buildings, and similar man made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Selection of Treatment Areas: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

Application Directions: Rats: Apply 4 to 16 oz of bait per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days. The amount of bait in this container is unlikely to be sufficient to kill more than 2 or 3 rats.

Mice: Apply $\frac{1}{2}$ oz (1-2 level tablespoons) of bait at 8 to 10 foot intervals. Larger placement (up to 2 oz) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

Rats/Mice: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

SHORACE AND DISPOSAL

Donot communication water, food, or feed by storage and disposal.

Pesticide Storages

Store in original container in a cool, dry place away from food and foodstuffs. Keep product in locked storage area inaccessible to children and pets.
