CAUTION

STATEMENTS OF PRACTICAL TREATMENT

- IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.
IF INHALED: Remove victim to fresh air.
IF IN EYES: Flush eyes with plenty of water. Get medical Attention if irritation persists.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist.

Personal Protective Equipment (PPE): Applicators and other handlers must wear:

- * Long-sleeved shirt and long pants
- * Waterproof gloves
- * Shoes plus socks

Mixer/loaders and applicators must wear dust/mist filter respirator meeting NIOSH standards of at least N-95, R-95, or P-95. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS:

Users should wash hands before eating, drinking, chewing gum, using tobacco or using toilet.

ENVIRONMENTAL HAZARDS STATEMENT: Do not contaminate water when disposing Equipment wash waters.

DIRECTIONS FOR USE:

It is a violation of federal law to apply this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- * Coveralls
- * Waterproof gloves
- * Shoes plus socks

BMP 123 (2X WP) is a microbial larvicide for use against the listed lepidopterous insects. Close scouting and early attention to insect infestations are recommended. BMP 123 (2X WP) must be ingested to be effective. The following directions should always be followed:

1. Larvae must be actively feeding on exposed plant parts.
2. Applications must be made when larvae are in the early instars before extensive crop damage occurs. For control of mixed insect populations or overlapping generations, use BMP (2X WP) in combination with another approved insecticide.
3. Thorough spray coverage with BMP 123 (2X WP) is required for consistent control. Spray nozzles and volume applied will vary depending on crop and pest. Under heavy pressure, higher rates, increased gallonage, and shorter spray intervals will improve crop coverage and pest control.
4. Repeat applications at 3-14 day intervals to maintain control. This will depend on weather, plant growth rate, and insect activity.
5. In applications on hard to wet crops such as cole crops, a spreader sticker approved for use on growing and harvested crops, should be added to improve coverage and weathering properties.
6. Unless otherwise indicated use at least two (2) gallons of water per acre except in California where five (5) to ten (10) gallons are typically used.

7. BMP 123 (2X WP) may be applied as a pre and post harvest treatment to raw agricultural commodities.

8. Do not apply this product through any kind of irrigation system.

MIXING INSTRUCTIONS:

Fill tank with 1/2 to 2/3 of the desired amount of spray water. Initiate vigorous agitation and continue throughout mixing. Slowly pour BMP 123 (2X WP) into water where surface turbulence is greatest. After all wettable powder is dispersed, fill tank with remaining water and continue agitation for 10 minutes before spraying. Completely mix BMP 123 (2X WP) before adding other products in a tank mix. Maintain continuous agitation during spraying.

BMP 123 (2X WP) may be applied in conventional aerial and ground equipment with sufficient water to provide thorough coverage. Approved spreader/stickers should be added to the mix tank after BMP 123 (2X WP) has been mixed with the appropriate amount of water.

APPLICATION RATE

Crop	Pest	Pounds/Acre
Vegetables and commercial crops of the following groups:	Loopers	1/2 to 1.0
	Hornworms	1/2 to 1.0
	Imported Cabbageworms	1/2 to 1.0
Root and Tuber	Diamondback moth	1/2 to 1 1/2
Leaves of Root and Tuber	Green Cloverworm	1/2 to 1.0
Bulb	Webworm	1/2 to 1.0
Leafy	Armyworms*	1/2 to 2.0
Brassica (Cole Leafy)	Saltmarsh Caterpillar	1/2 to 1.0
Legume	Heliothis (Helicoverpa) Spp.**	1/2 to 2.0
Foliage of Legume	Cutworms	1/2 to 1.0
Fruiting	Pickworm	1/2 to 1.0
Cucurbit (Melons, Squash, Cucumbers, etc.)	Melonworm	1/2 to 1.0
	Rindworm Complex***	1/2 to 1 1/2

* BMP 123 (2X WP) may be used to suppress 1st and 2nd instar armyworm larvae when populations are light and full coverage ground applications are used.

** Tobacco Budworm, Tomato Fruitworm, Corn Earworm. On tomatoes apply weekly in a preventative program.

*** Apply weekly in a preventative program.

* BMP 123 (2X WP) can be used to suppress podworm and armyworms in an integrated pest management program.

** Suppression only.

Crop	Pest	Pounds/Acre
Artichokes	Armyworms	1/2 to 2.0
	Loopers	1/2 to 1 1/4
Cotton	Tobacco Budworm*	1/2 to 2.0
	Cotton Bollworm*	1/2 to 2.0
	Loopers	1/2 to 1.0
	Cotton Leaf Perforator	1/2 to 1.0
	Cotton Leafworm	1/2 to 1.0
	Saltmarsh Caterpillar	1/2 to 1.0
	Armyworms	1/2 to 2.0

* Use in conjunction with regular scouting in an integrated pest management program when beneficial insects are present. Applications should be made against light to moderate populations of 1st and 2nd instar larvae. Repeat applications at 3 to 5 day intervals as required and as long as population suppression is satisfactory. For added control of budworms and bollworms tankmixing of BMP 123 (2X WP) with an approved ovicide is recommended. Use of the resulting tank mix must be in accordance with the most restrictive of label limitations and precautions. No label dosage rates should be exceeded. This product can not be mixed with any product containing a label prohibition against such mixing.
