BMP 144 (400 G) Mosquito Biolarvicide Pellet

ACTIVE INGREDIENT: *Bacillus thuringiensis* subspecies *israelensis* solid spores and toxins, 400 International Toxic Units (ITU) per milligram as determined against *Aedes aegypti* (equivalent to 0.182 billion ITU per pound of product)..... 5.71%

OTHER INGREDIENTS: 94.29%

100.00%

The percent active ingredient does not indicate product performance and potency measurements are not Federally standardized.

CAUTION
KEEP OUT OF REACH OF CHILDREN

STATEMENTS OF PRACTICAL TREATMENT
IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.
IF IN EYES: Flush eyes with plenty of water. Get medical attention if irritation persists.

See back panel for Additional Precautionary Statements and Directions for Use.

NOTICE TO USER:

Seller makes no warranty, expressed or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. User assumes all risks of use, storage or handling not in strict accordance with label instructions.

In case of emergency endangering life and property involving this product, call collect, day or night, Area Code (800) 759-1602.

NET WEIGHT: _____

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

CAUTION: Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

Mixer/loaders and applicators must wear a dust/mist filtering respirator meeting NIOSH standards of at least N-95, R-95, or P-95. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.

ENVIRONMENTAL HAZARDS:

Do not apply to treated, finished drinking water reservoirs or drinking water receptacles.

DIRECTIONS FOR USE:

It is a violation of Federal Law to apply this product in a manner inconsistent with its labeling. BMP 144 (400 G) may be applied to any water sites except treated, finished drinking water reservoirs or drinking water receptacles. Ready to use.

MOSQUITOES:

| Habitat | Rate Required for Control* (Lbs. / Acre) |
|---|---|
| Pools, ponds, flood water, pastures, ditches, ricefields, brackish water, light to moderate populations. | 1.25 - 5 |
| Catch basins, tidal water, salt marshes, storm water detention areas, mangrove swamps, moderate pollution or organic content. | 5 - 8 |

SPECIFIC APPLICATION INSTRUCTIONS:

Apply 1.25 - 16 pounds of pellets per acre with conventional aircraft or ground equipment. Use higher weights in heavily polluted water, when populations are high, when larvae are nearly grown or in fourth instar, and when aquatic or covering vegetation is dense. Most treatments require no more than 5 pounds / acre. Apply only against mosquito larvae not pupae.

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment and weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

*Allow 24 hours for control. Under certain conditions, such as catch basins, sewage waste lagoons, high pollution or organic content, heavy vegetative cover and high populations, the above application rates can be doubled.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL:

Wastes resulting from use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL:

Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
