Dursban* 50W Insecticide

EPA Reg. No. 62719-68

For Control of Mole Crickets in Turfgrasses

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Dursban 50W before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Dursban 50W according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Dursban 50W.

Directions for Use

To control mole crickets in turfgrasses apply Dursban 50W at a rate of 1.5 to 2.2 ounces per 1000 sq ft (4 to 6 pounds per acre) using broadcast or suitable hand held application equipment. Apply in a minimum spray volume of 50 gallons of water per acre. Apply when early stage nymphs are active. Efficacy may be enhanced by spraying late in the afternoon or early evening and irrigating the turf prior to treatment to move mole crickets close to the soil surface.
