Dursban* ME20 Insecticide EPA Reg. No. 62719-88

Use in Food Service Establishments†

ATTENTION

†This supplemental labeling contains new or revised sections of the Dursban ME20 label recently approved by EPA. Use of this labeling to supplement existing Dursban ME20 labeling is suggested until such revisions appear on new Dursban ME20 containers.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Dursban ME20 before applying for applicable use directions and insects controlled. Carefully follow all precautionary statements.
- Use of Dursban ME20 according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Dursban ME20.

Directions for Use

General Directions for Use: Dursban ME20 may be applied within residential and non-residential buildings or structures and within industrial, institutional and commercial buildings. Applications can be made in food service establishments such as restaurants, cafeterias, taverns, delicatessens, mess halls, school and institutional dining areas, hospitals, mobile canteens, vending machines, groceries and markets. Applications can also be made in non-food areas of food manufacturing and food processing establishments including garbage rooms, lavatories, drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning or bottling).

Treat where insects are found or normally occur. Application of a 0.2% solution is suitable for control of light pest infestations (i.e., maintenance applications). Application of a 0.4% solution provides residual control of heavy infestations (i.e., clean-out applications). Where extended residual control is desired, apply Dursban ME20 at a rate of 0.5% solution. A period of 4 to 7 days is normally required to observe maximum effectiveness on insect populations; therefore limit retreatments to no more than once every 7 days (14 days in food service establishments). Apply spray solutions in such a manner as to minimize spray drift to non-target surfaces.

General Directions for Use in Food Service Establishments: Dursban ME20 may be applied in food service establishments such as restaurants and cafeterias. Treat where insects are found or normally occur. Application of a 0.2% solution is suitable for control of light pest infestations (i.e., maintenance applications). Application of a 0.4% solution provides residual control of heavy infestations (i.e., clean-out applications). For extended residual control, apply Dursban ME20 at a rate of 0.5% solution. Application within food service establishments is limited to spot and/or crack and crevice treatments. For crack and crevice treatments, apply small amounts of material directly into openings leading to voids and hollow spaces in walls, equipment legs and bases, or which occur at points between elements of construction, or between equipment and floors. Equipment capable of delivering a pinstream of spray should be used for crack and crevice application. For spot treatments, an individual spot should not exceed 2 square feet. Repeat treatment as needed but not more than once every 14 days. Applications of this product in food service establishments other than as a spot and/or crack and crevice treatment are not permitted. Apply spray solutions in such a manner as to minimize drift to non-target surfaces.
