## Trifluralin Technical

EPA Reg. No. 62719-99

### Trifluralin Technical for Inhibition of Plant Root Encroachment in the Following Areas:

Sewer Pipes • Concrete/Asphalt Cracks • Burial Vaults/Tombstones • Waste  
Burial Sites • Bike/Golf Cart Paths • Swimming Pools • Septic Fields • Tennis  
Courts • Dams/Levees<sup>1</sup> • Sidewalks • Landfills • Gas Pipelines • Roads • Utility  
Substations • Irrigation Systems<sup>2</sup> • Curbs • Building Foundations

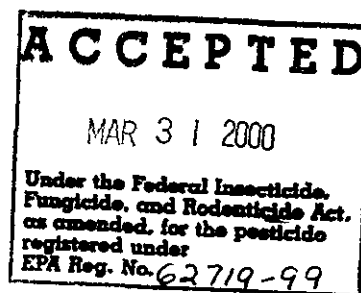

<sup>1</sup> The biobarrier product must be placed a minimum of 6 feet from the body of water.

<sup>2</sup> Use in irrigation system components is limited to crops for which trifluralin (Treflan® herbicide) is registered as a soil-applied treatment.

#### Directions for Use

End-use products manufactured employing technology developed and patented by Battelle Memorial Institute should be used to inhibit plant root encroachment.

Products such as sewer gaskets, extruded geotextile fabric or netting, crack filling material, drip irrigation emitters, or similar products for uses as indicated above, manufactured in organic polymeric carriers impregnated with trifluralin and used according to the manufacturer's instructions will inhibit root encroachment for extended periods of time.

# Trifluralin Technical

**EPA Reg. No. 62719-99**

### Registration Notes:

Source label text based on EPA-accepted supplemental labeling for Trifluralin Technical dated October 22, 1990.

**Proposed Changes by Amendment:**

1. Allowable Use Sites: (1) The use prohibition for "irrigation systems" regarding edible roots and tubers grown for food or feed was deleted; and (2) The following statement was substituted: "Use in irrigation system components is limited to crops for which trifluralin (Treflan\* herbicide) is registered as a soil-applied treatment."
